GARDEN ROOTS

NO GARDEN COMPLETE WITHOUT THEM. A FINE COLLECTION.
NO OTHER PAGE IN OUR CATALOGUE OFFERS MORE FOR THE MONEY.

ASPARAGUS
Colored Leaflet on Asparagus Culture Free.
A deep rich, soil is indispensable to secure large, heavy stalks. Plant in rows four feet apart, with the plant two feet distant. Set so that the crowns are about three inches below the surface. Top dress annually in the fall with stable manure and fork under in the spring.

Columbian Mammoth White
A distinct variety of mammoth size, great yield, and superior quality; remarkable for the clear whiteness of its stalks, which retain their purity and color until several inches above the surface. Price, 75 cents per dozen, postpaid; $2.00 per 100; $15.00 per 1,000 by express or freight.

Other Varieties
GIANT ARGENTEUIL, PALMETTO, CONOVER'S GIANT, AND BARR'S MAMMOTH. The standard market sorts; all green and tender. Price, 75 cents per dozen, postpaid; $2.00 per 100; $15.00 per 1,000, by express or freight.

SCARFF'S CHOICE RHUBARB

SCARFF'S CHOICE RHUBARB

COLORED LEAFLET ON RHUBARB CULTURE FREE
People are just beginning to realize the great profit in the culture of Rhubarb in the open field, also as a forcing crop for winter. It yields enormous profits. Anyone can succeed, as the culture is very simple.

Linnaeus
Large, early, tender and fine. The very best of all. 20 cents each; $2.00 per dozen, postpaid; $8.00 per 100.

Queen
Strong, vigorous grower, producing extra large stalks of finest quality, of a decided pink color. For canning or cooking in any way its quality is unsurpassed. Price of good roots, 20 cents each; $2.00 per dozen, postpaid; $8.00 per 100.

SCARFF'S Money Maker HORSERADISH

This new variety makes an enormous yield and is so early that it can be marketed before the common kind is ready; besides the roots are much larger and whiter. The roots sell in market at 5 to 10 cents per pound, and yield as high as 8,000 pounds per acre. It requires about 10,000 sets for an acre, and the crop is ready for the market the first year. It is easy to grow; every plant will live. Net profit, $300.00 to $600.00 per acre. Try at least 1,000 sets if you cannot plant an acre. It is ready sale in any of the large cities. Price of good roots, 75 cents per dozen postpaid; $2.00 per 100, by express; $20.00 per 1,000.

Common Horseradish
This useful condiment is easily grown, and prefers a rich, moist loam. Price, 50 cents per dozen; $1.50 per 100; $15.00 per 1,000.

Holt's Mammoth Sage

Plants of strong growth, of unusual substance, strong flavor and of superior quality. Prefers a rich, moist loam. Price, 10 cents each; $1.00 per dozen, postpaid; $6.00 per 100 by express.

Hop Plants
GOLDEN CLUSTER—Of rapid growth, attaining a height of 20 feet if given support, with abundant ornamental, deeply-lobed foliage. Golden Cluster Hop is an exceedingly choice variety which bears large clusters of yellow-green hops in such profusion as to completely envelop the plant in late summer and autumn. Each, 25 cents; dozen, $2.00.

NOTE.—A colored plate on Rhubarb Culture, also one on Asparagus Culture, will be mailed free on application.
A Greeting to Our Friends

We offer for your approval our 1922 catalogue which describes and quotes prices on the products of our farms. Our stocks are up to our usual high standards upon which our business has been built. We solicit your patronage once more and hope we may number you as one of our customers.

Our Nursery and Seed Farms now comprise 1,400 acres of fertile land in the famous Miami Valley of southern Ohio. The business is owned and operated by W. N. Scarff and his two sons, Maxwell M. Scarff and Howard N. Scarff, both graduates of the Ohio State University in the College of Horticulture. The nursery has been in operation for more than a quarter of a century. It grew from the meager beginning of one-half acre of blackberries to 1,400 acres of nursery, fruit and seed crops at the present time. Our growth has been gradual but regular and healthy, each year being a substantial gain over the preceding one. Around this half acre of blackberries as a nucleus has grown the present business. At first only fruit was grown, then the plant trade developed, then the nursery, then a growing of farm seeds, ornamental plants and greenhouses, and in later years the feeding of cattle, hogs and sheep, dairying and all other branches that go with a general farm plan.

Our land is practically all tillable and it is made to grow great crops. We feed annually 300 to 500 head of cattle for the markets. 800 to 1,200 head of hogs and 400 to 600 head of sheep. We also operate three large dairies of 80 or more cows. All this is a part of our working plan to keep up the fertility of our farms, orchards, and nurseries. We haul to the farm orchards and berry fields each year over 3,000 large spreader loads of well rotted manure made upon our own farms. We buy large quantities of corn, oats, hay, cotton seed meal, tankage, etc., beside our own crops we grow on the farm and by this means our land is growing richer each year and yields are naturally heavier. Beside all the other feed we have fifteen large silos holding over 3,000 tons of ensilage. This requires about 150 to 200 acres of good corn to fill them. Our farms are fine corn land and we select the very best for our seed customers and as we have so much to select from you can depend upon getting the very best that can be had. We could use several pages more telling about our plant but we cannot possibly spare the space as we must describe our products and price them to you.

Our prices you will find reasonable and the quality of the stock we handle first class in every way. If you have never sent us an order, do so this year and compare our stock with other growers. We know we can please you.

We wish to thank our old customers for their liberal patronage in the past and hope we may add many new customers this year and we feel sure we will hold all the old ones.

With kindest regards, we are,

Very respectfully,

W. N. SCARFF & SONS.

New Carlisle, Ohio.
Fall Bearing Strawberries

Much has been written in the past few years about Fall Bearing Strawberries. To accommodate our customers we are growing the most productive varieties and can supply good strong plants. These varieties are very productive and will bear luscious fruit until killed by frost in October. For best results keep all bloom picked off in spring and do not allow them to bear regular crop in June. Our varieties are the best and most productive for the home garden and for commercial growers.

Progressive Everbearing Strawberry

See last page cover. This valuable Everbearing Strawberry is beyond doubt the best of its class. We do not think it has an equal and our improved strain is certainly a great cropper and a sure bearer of luscious fruit. It has never failed to produce an abundant fall crop on our grounds. The plant closely resembles Dunlap, it is slender, long rooted and a very thrifty grower, foliage is ample, free from disease and a beautiful rich green. If allowed to make runners the Progressive will bear on the new set plants, even before they take root. However, for best results we advise cutting off all runners. If this is followed the plants will attain an enormous size. They will throw out from 8 to 15 fruit stems and the berries will be large and beautiful. The berries of the Progressive are of excellent quality, delicious flavor and beautiful color. They cannot be surpassed for home use, being equally delicious if eaten fresh or after canning. Many of our customers are growing Progressive for market, and they are making big money as the fruit sells readily at big prices. The fall bearing strawberries have a fine flavor far surpassing that of the standard sorts. They are sweet, mellow and aromatic, a flavor you can enjoy from June until early winter frosts. Price, good plants, 75c per doz., postpaid. $2.00 per 100; $15.00 per 1,000, by express.

Superb Fall Bearing Strawberry

As a fall cropper, it yields fruit only on the parent plant. The berries are a rich blood-red from surface to center. As a June cropper it yields enormously on the same plants and it is the Strawberry plant that should be grown by every berry grower. It is a rare treat to go to the strawberry patch and gather luscious fruit during the months of September and October. These fall-bearing sorts of strawberries, together with the St. Regis red raspberry, should be in every fruit grower's and farmer's garden, and even the city and village dweller can grow fine fruit and get plenty of good fun growing these valuable new and wonderful berries. Price, only 75c per dozen, postpaid; $2.00 per 100; $15.00 per 1,000.

Names Wanted

When you send your order will you mention one or more of your neighbors who may be interested in our stock? We do not want long lists of irresponsible persons but good live prospects. We will send something extra in your order if you do this.
The Chesapeake (Per.)

It is acknowledged to be one of the finest flavored berries of the strawberry family and if quality is considered, you will make no mistake in planting largely of Chesapeake. Quality, however, is but one of its good traits, for it is one of the largest and most prolific varieties grown.

The color is a dark red, resembling the Marshall. It begins ripening a few days ahead of the Gandy and continues to bear abundantly as long as this variety, yielding, in many cases as much again as this old-time favorite.

The plant growth of the Chesapeake is strong and all that could be desired. It makes immense plants with good strong fruit buds. The leaves are large, almost round, and protect the bloom and fruit from the frost and weather. It has never been known to rust, and the foliage is particularly clean and glossy. Blooms are perfect and it is not necessary to pollinate with any other variety.

The fruit is uniformly large and well-shaped, firm enough to ship to distant markets. It colors all over nicely so there are no green tips to disfigure it. When crated ready for market it presents a very striking appearance, always brings a fancy price.

If you do not have this variety in your collection, we advise you to plant, at least, a few thousand, and you will be enthusiastic with the results. Our plants are pure, all from new beds and first-class in every respect. **Price**, 50¢ per dozen, postpaid; $1.50 per 100; $10.00 per 1,000, by express, not prepaid.

**KING EDWARD (Per.)** One of the largest berries in cultivation. It originated in Holmes County, Ohio and is highly recommended by the Ohio Experiment Station. The plants are large, stocky and healthy, vigorous grower and heavy cropper. The quality of King Edward is of the very finest, sweet, sprightly and melting in the mouth. Fine for dessert and preserving. Little sugar required. It ripens early in June and the fruit is large from the beginning of the season to the end. Firm and goes to market in good shape. Always brings fancy price due to its enormous size. **Price**, 50¢ per dozen; $1.00 per 100; $8.00 per 1,000.
CHARLES I.

Earliest Strawberry Grown

The big profits in Strawberry growing are generally made at the start of the season before the market is overcrowded.

CHARLES I. (Per.) Ripens nearly a week before Michel’s Early and is very productive, yielding more quarts of large, fine looking berries than any other variety. It is not often that you find so many good points in a single berry as in Charles I. No doubt this will become the leading early berry as it has been thoroughly tested out on the extensive berry fields of Michigan, where it originated five years ago. Our stock is fine and true to name. Price, 50 cents per dozen, postpaid; $1.00 per 100, by express, $8.00 per 1,000.

Gibson (Per.) This is a Michigan berry with a record of 640 cases from an acre. It is a perfect blooming variety, strong grower, healthy foliage. It is midseason, about the same as Dunlap. Fruit stems are large and strong and is held up well from the ground. The foliage is strong and amply protects the fruit. The berry is a rich red color, being red to the core, which makes it a valuable berry for preserving. It is a large berry, being regular in form and continues good size until the very last picking. We have successfully grown the Gibson for several years and find it one of our leading commercial varieties. Price, 50c per dozen, postpaid; $1.00 per 100; $8.00 per 1,000.

Tennessee (Per.) This variety has given great satisfaction wherever planted. It ripens about the same season as Dunlap and somewhat resembles that variety in appearance, except that it is larger, deeper color and excellent flavor. It is a heavy producer and should be found in both the home garden and commercial plantings. Thrives well on quite light dry soil. Price, 50 cents per dozen; $1.00 per 100; $8.00 per 1,000.

Sample (Per.) Large size and fine quality, quite firm; continues a long time in fruit. The berries are large to the last. For the market man it is the best strawberry ever grown. It will yield as many berries as Haverland, and will average as large as Bubach. Colors all over at once. A berry that will do what is claimed for it. It is the best one found yet. There is no weak spot in it. Foliage perfect. “Needs no petting.” Price, 50c per dozen; $1.00 per hundred; $8.00 per thousand.

Corsican (Per.) A distinct new variety of value for market and home garden. The fruit is dark crimson color, rich, and delicious flavor, large size and quite firm. The foliage is perfectly healthy, making large plants that will protect the fruit from sun and rain. It is a good grower, making the right number of plants and an enormous yield of the finest, largest berries imaginable. Our customers are highly pleased with this great berry. Corsican is a wonderful berry. It is a great pleasure and very profitable to haul the largest berries that go to market. That kind always sells and at the very top price. Corsican is not only big, it is a beautiful color, a great yielder, a good foliage to resist disease and drought and even weeds and neglect, but such a variety as Corsican should not be neglected if possible. Do you want big berries? Then plant Corsican. Price, 50 cents per dozen, postpaid; $1.00 per 100; $8.00 per 1,000.

Glen Mary (Imp.) This variety is a very vigorous grower and an excellent producer. Berries are large and of high quality, ripening in mid-season. Requires a moist, loamy soil for best results. One of the reliable standards for the main crop. Price, 50 cents per dozen; $1.00 per 100; $8.00 per 1,000.
Warfield

Warfield (Imp.) The plant is a very vigorous grower, exceedingly productive, bears picking daily. The berries are of good quality, dark color, medium size, firm, regular in size, sub-acid. A very profitable berry for nearby or distant market. Season early. Price, 50c per dozen; $1.00 per 100; $8.00 per thousand.

Senator Dunlap

Senator Dunlap (Per.) A well-tested, wonderfully productive variety, one of the safe sorts to plant everywhere and sure to take a high place among the prominent standard sorts. Plant resembles Warfield, rampant runner, should be restricted in its production of plants; fully equal to Crescent and Warfield in its ability to succeed under all circumstances. Fruit good size, regular form, beautiful bright red, glossy, firm, splendid keeper and shipper, excellent quality; one of the best for canning; ripens early and continues a long time. It promises to stand at the head in its wonderful ability to ripen a good crop under almost any condition of drought or neglect. Price, 50c per dozen; $1.00 per 100; $8.00 per 1,000.

Haverland

Haverland (Imp.) Exceedingly productive. Fruit large and fine. One of the most popular of the well-tested varieties. It will stand more frost than most any other variety, often bearing large crops when others are killed. We can always depend on a large crop. No berry will produce more fruit per acre or sell for more money. The demand for plants is always great. Price, 50c per doz.; $1.00 per 100; $8.00 per 1,000.

Aroma

Aroma (Per.) One of the most popular late market varieties. A good plant and a good bearer of large, handsome fruit; bright red in color, uniform roundish heart-shape; firm and of good quality. Somewhat resembles Gandy in appearance. A choice variety and reliable. Price, 50c per dozen; $1.00 per 100; $8.00 per 1,000.

Gandy

Gandy (Per.) This is one of the most reliable large, late berries that is grown. It is one of the old standard varieties that you can depend upon. The plant is a strong grower, a good plant maker. The large, handsome appearance of the fruit always commands for it a high price in market. The fruit always grows large and is one of the best shipping varieties known. In some localities the Gandy is not so productive as some varieties, but the fact that it ripens late and is of a hardy nature indicates that it will do well in any soil where other berries grow. Price, 50c per dozen; $1.00 per 100; $8.00 per 1,000.

Brandywine

Brandywine (Per.) Valuable late variety; deep red, firm, prolific. A good market sort. Price, 50c per dozen; $1.00 per 100; $8.00 per 1,000.

Steven's Late Champion

Steven's Late Champion (Per.) This variety makes an abundance of strong plants with good foliage that protects the blossoms and fruit from frost. Uniform in size; color good red, and firm enough for shipment, as it is one of the very best to hold up after picking. Its season to ripen is about the same as Gandy. Price, 50c per dozen; $1.00 per 100; $8.00 per 1,000.

Nick Ohmer

Nick Ohmer (Per.) Produces large fruit of excellent quality. The plants are strong, healthy and free from disease, stand up well and have good strong fruit stems. The fruit is in the fancy market class and will prove satisfactory to all who plant it. It originated near Dayton, O., and is recommended by all prominent growers. This variety should be in your collection if you admire fine large specimens that are attractive to the eye and pleasing to the palate. Price, 50c per doz., postpaid. $1.00 per 100; $8.00 per 1,000.
SCARFF'S RASPBERRIES

Culture Raspberries will do well on any upland soil that will produce a good corn crop. Land should be thoroughly prepared and well enriched. Keep well cultivated and free from weeds and suckers. As soon as they are done bearing, cut out the old wood to give more vigor to the young canes. Plant in rows six feet apart and two and one-half feet apart in rows. Avoid wet lowlands.

WE GROW THE FINEST RASPBERRY PLANTS IN THE WORLD. OUR VARIETIES ARE THE KINDS THAT MAKE MONEY. THEY HAVE DONE IT FOR US. THEY WILL DO IT FOR YOU.

“The Scarff Raspberry”

HISTORY

The Scarff Raspberry came from a seedling that came up by the side of a Gregg plantation of one of our nearby neighbors about ten years ago. From a single plant he propagated the stock until he had growing about 100 plants. It began to attract the attention of growers by its unusual good qualities, and finally by an urgent invitation the writer was induced to visit the plantation. So many new plants have been introduced that it was with some misgivings and reluctance that we consented to go. The berry was really a grand surprise as it was just as good in every way as the grower had represented. Fortunately he had been wise enough to keep every plant on his own ground, and we purchased the entire stock and privilege of propagation and sale.

MOST PRODUCTIVE AND LARGEST OF ITS CLASS

W. N. Scarff—The Scarff Raspberry has made the best growth of any black cap I have, and I have discovered no sign of disease. It gives promise of being one of the most productive and largest of its class.

ROSS COWEN, Ohio.

This new variety of Black Cap Raspberry has many superior qualities in its favor when compared with older sorts.
1st. It is the most productive of any Blackcap on the market.
2nd. It is perfectly hardy in any fruit growing section of the United States.
3rd. It is practically free from anthracnose and other diseases.
4th. The fruit is large, firm and attractive in appearance.
5th. It resists drought better than other kinds because the foliage is perfect and the canes vigorous and full of life.
6th. It produces 4 to 8 good, strong young canes each season for the coming crop.
7th. It ripens all its fruit to very ends of the canes and maintains a uniform size.
8th. It begins ripening a few days before Gregg and continues for a period of 14 to 18 days at a time when fruit is in best demand for canning and fancy price.
9th. Plants grow well, and if cared for almost a perfect stand can be secured.
10th. It has more good points than any other blackcap ever introduced, hence the name “Scarff.”

In size it compares with Cumberland, possibly a trifle larger. In productiveness it is far ahead of any Black Cap we grow. It is absolutely hardy. Canes practically free from disease and strong, upright growers. The canes are cleaner by far than any Raspberry we have ever seen and we think it will stand heat and drought better. It makes an abundance of good strong canes, hence our low price, which should induce every grower to plant several acres. We have good strong plants to offer at the following prices: $1.00 per dozen; $4.00 per 100; $50.00 per 1,000.
Plum Farmer A variety from Northern New York, and a few days later than Palmer, maturing the entire crop in a very short period, making it one of the most profitable early market sorts. The berries are thick meated, firm, with a bloom similar to Gregg. Berry large and very attractive when picked ready for market. Worthy of a trial in the home garden and commercial field. Price, 75¢ per dozen; $1.00 per 100; $30.00 per 1,000.

Kansas A variety of worth. It ripens a few days after the Eureka, and is of large size. Canes quite thorny and covered with thick bluish bloom. Price, 75¢ per dozen; $3.00 per 100; $25.00 per 1,000.

Palmer Perhaps the best of the earlier varieties. Fruit large and good size. B'uh a vigorous grower, and very productive. Price, 75¢ per dozen; $3.00 per 100; $25.00 per 1,000.

Hoosier A new black cap of considerable value—early, hardy and prolific. Price, $1.00 per dozen; $4.00 per 100; $30.00 per 1,000.

Black Diamond Valuable for evaporation, canning and home consumption. One of the strongest growers, making an abundance of good, clean wood which ripens up well in the fall, thus enabling it to withstand the cold winters remarkably well. Fruit is jet black and juicy with few seeds. Season about the same as Kansas. Well worthy of a trial. Price, $1.00 per dozen; $4.00 per 100; $30.00 per 1,000.

Gregg An old variety of merit too well known to need description. Price, 75 cents per dozen; $3.00 per 100; $25.00 per 1,000.

“Munger” for Fancy Market If you do not grow Munger your plantation is not complete and you are missing a grand opportunity to reap large profits. An acre of Munger will give astonishing results. It is no doubt the very best of the late kinds. Fruit very large and firm, juicy and splendid for canning. Canes upright and strong growers. Fruit easily sells for 60¢ per bushel in advance over other blackcaps. An improvement over Gregg, which it resembles in cane and fruit. You can safely plant it for either home use or market. Price, $1.00 per dozen; $4.00 per 100; $30.00 per 1,000.

Cumberland In hardiness and productiveness it is unexcelled by any other variety. In size, the fruit is simply enormous. The berries run seven-eighths and fifteen-sixteenths of an inch in diameter and are of such handsome appearance that their fruit sold for 10¢ per quart when other varieties were selling for 6¢ to 7¢ per quart. In spite of its unusal size, the fruit is possessed of great firmness and is thus well adapted for standing long shipments. It follows Palmer and Souhegan and precedes Gregg a short time, making it a midseason variety. The bush is exceedingly healthy and vigorous, throwing up stout, stocky canes, well adapted for supporting their loads of large fruit. It has shown itself remarkably free from the scourge of its family, anthracnose. Large growers report yields of two and three times as much per acre as Ohio under same conditions, and far ahead of other varieties. Price, 75¢ per dozen; $3.00 per 100; $25.00 per 1,000.

[Image of Cumberland Raspberries]
Red and Purple Raspberries

Very Profitable Sorts for City Markets and Most Productive

Erskine Park  A new everbearing red raspberry. This berry originated at Lee, Massachusetts. It was found growing in a Cuthbert plantation and is no doubt a seedling of this old favorite. It bears a good June crop and then after the old canes have been cut out fruit buds begin forming on the tip ends of the new growth and begin to ripen about September 1st and continue to ripen until late in fall. The fruit is quite large and of excellent flavor. It is firm enough for market and very productive. The fruit is of peculiar shape which distinguishes it from all other red varieties. It is large at the base and tapers to a point very much as does the egg of a quail. This is a very popular new variety in the east. Our plants direct from a reliable grower are now established and bore fruit last summer and late into the fall season. We hope to have all our customers try it. Price, 25¢ each; $1.50 per doz.; $5.00 per 100.

King  The earliest Red Raspberry on record. It is the early Red Raspberry that makes the big money; often sells for 25¢ per quart. You want to add this one to your collection. “Round, medium size; light crimson colored; firm and of excellent quality. A seedling of Thompson and ripens about the same time but large and more productive.” King is in a class by itself. Nothing compares to it in yield, beauty, firmness or size. We have a fine stock of pure plants. Order at once. Our plants are genuine. Price, 15¢ each; 75¢ per doz.; $3.00 per 100.

Brilliant  A variety surpassing in productiveness, size, color and hardness the famous Miller. Ripens its fruit earlier and faster, producing bright, glossy, brilliant red berries, handsome. Being a remarkably good shipper, reaching market in all its brilliancy and firmness, it finds ready sale at good prices. Price, 20¢ each; $1.00 per dozen; $5.00 per 100.

Miller’s Red  Very early. Berries bright red, large, and hold their size to the end of the season. Very firm, hence valuable to ship to distant market. Price, 15¢ each; 75¢ per doz.; $3.00 per 100.

Note—If Raspberries are wanted sent by mail, add 15¢ per doz.; 40¢ per 100, extra for postage, except where marked postpaid.
St. Regis
Everbearing Red Raspberry
Bears in 80 Days from Planting

The most popular everbearing red raspberry ever introduced because it actually does bear a big crop of luscious fruit in June and begins again in Sept. and bears continuously until killed by hard freezing. We have had it bear up to November 10th after snow had fallen. It does not bear a few straggling fruits but the bushes are bending down with fruit in all stages of development, some in bloom, some half ripe and some full ripe. Valuable alike for market or the home garden.

St. Regis is one of the most valuable raspberries for the home garden as well as for market. It is so firm that it will stand shipping hundreds of miles, arriving at its destination in the very best condition. It succeeds upon all soils, whether light and sandy or cold and heavy clay, and the canes are absolutely hardy, always and everywhere, so far as tested. Market gardeners and fruit growers are making plenty of money and there is a regular scramble for plants. If you, Mr. Gardener or Fruit Grower, do not have the St. Regis then you should right now order just as many plants as you can possibly make room for. Price of good strong plants, each, 10c; 12 for $1.00, postpaid; 100 for $4.00, by express.

Cuthbert A leading market variety for main crop. Price, 15c each; 75c per dozen; $3.00 per 100.

Herbert
Red Raspberry

Originated in Canada. It stands severe winters, even 40 degrees below zero, absolutely uninjured, and has never failed to produce a heavy crop of the most delicious fruit. It is a recognized fact that the farther north any fruit is grown, the better is its quality, and this "Child of the Northland" is no exception to this rule. The fruit is as large as the largest. It is as rich and highly flavored as the best, and by far exceeds any other kind in hardiness, rugged, thrifty constitution of plant, and is very productive.

Price, good plants, 20c each; $1.00 per dozen; $5.00 per 100.

La France We have a stock of this new giant everbearer which we can offer for 50c each, or $5.00 per dozen.
Royal Purple
The $1000.00 Raspberry

A purple variety from "Hoosierdom" for which $1,000.00 was paid simply for the control of the plants. It is ironclad as regards to hardiness. A deep red color, far superior in this respect to Columbia and Shaffer. Very firm, very late, very large, and sells at highest market price.

The originator says:
"I have been in the berry business more or less for about 60 years, and in that time have tried a great many kinds, in fact every kind which gave promise of being better than those which had come or gone before; and wish to say if I could have but one kind of raspberry I should unhesitatingly choose the 'Royal Purple.'"

First. It is as hardy as a bur oak.
Second. It is a strong grower on rich soil.
Third. It is the greatest bearer of any I have ever seen when it is taken into consideration how long it will continue to bear its great crop of berries, its productivity being second to none.
Fourth. It is among the very largest, if not the largest.
Fifth. The flavor is the best to my taste of any kind, be they black, red, yellow, white, or purple.
"Not because I am the originator, but because I believe it has the merit."
We have the Royal Purple growing and fruited and it certainly is a good one, and we consider it well worthy of a trial. Price, 25c each; $2.00 per dozen; $6.00 per 100.

Columbian  A purple variety once very popular. Vigorous and productive, rather soft, rich sprightly flavor. Excellent for culinary purposes. Price, 20c each; $1.00 per dozen; $4.00 per 100.

The New Cardinal Raspberry  This wonderful berry is a surprise in the fullness of its merits—its great growth, extreme hardiness and the exceeding productivity of its choice purple, pure-flavored berries. It will pay. It is not a novelty, but a variety of great merit. The New Cardinal will grow ten feet, and bears in proportion. Leading horticulturists who have seen this berry say that it is one of the wonders of the century, so far exceeding all others as to put it entirely beyond comparison. Judge Wellhouse, President of Kansas State Horticultural Society, said at the meeting of the Society that the introduction of the Cardinal Raspberry would add millions to the wealth of the farmers of the country because of its inherent great vigor and exceeding productivity. Price, 20c each; $1.00 per dozen; $4.00 per 100.

Haymaker  Is a purple cap not as dark as Columbia or Shaffer, and much larger and firmer than either of those varieties. Never crumbles, and stands up well in shipping. Sample crates have been shipped to distant points with entire satisfaction. It is a berry to grow for either home use or market. The originator has found it the most profitable berry ever raised for market, and has never yet been able to supply the local demand. So much of a favorite has the Haymaker become that local growers have said that it has ruined the sale of other varieties. Very popular as a canning berry. Many orders for berries for this purpose are placed a year in advance. Price, 20c each; $1.00 per dozen; $4.00 per 100.

Golden Queen  This variety is almost identical with Cuthbert, except in color; it being a beautiful yellow. Fruit large, productive; quality first-class. It is beyond doubt the finest and most profitable yellow berry grown. The fruit sells well on the market and is grand to display along with the red varieties. It attracts much attention. Price, 20c each; $1.00 per dozen; $4.80 per 100.
BLACKBERRIES

We excel in growing fine Blackberry plants. Our assortment is perhaps the largest of any grower in the United States. Our plants are mostly root cuttings, and as fine as can be grown. You make no mistake in ordering your Blackberries of us, as both our price and stock are right. Our plants will make you big money.

Eldorado This is one of the most valuable varieties for market and home use. It is a strong, upright grower, moderately full of thorns. About equal in productiveness to Snyder. The fruit is jet black, never coloring red after picking, fully as large again as the average Snyder berry. The flavor is excellent, differing from all others in this respect, imparting a rich aroma, melting and juicy with but little core. Highly recommended by experiment stations and growers everywhere. It will sell for 50 cents to $1.00 per bushel in advance of Snyder.

Eldorado is unquestionably one of the best commercial blackberries grown. The finest quality of the Blackberry family. It is not a new variety, but one of the meritorious kinds that become more popular each year. Price, 1½c each; $1.50 per dozen; $5.00 per hundred; $40.00 per 1,000.
Snyder One of the old favorites that is still popular wherever Blackberries are grown. It is medium size, strong grower, hardy, and wonderfully prolific. It will perhaps make more bushels per acre than any other variety grown. It should be included in every commercial collection. Price, 15 cents each; $1.00 per dozen; $4.00 per 100; $30.00 per 1,000.

Taylor Berry medium size; jet black; ripens late; of much value as it comes in after main crop of Snyder, and other kinds are gone. Bush strong grower. Price, 15 cents each; $1.00 per dozen; $4.00 per 100; $30.00 per 1,000.

Blower A very large Blackberry of finest flavor and jet black color. Look as large as Dew-

Mersereau This early, mammoth, ironclad Blackberry is by far the most valuable variety that has appeared since the advent of Wilson, over 30 years ago. It originated in Northwestern New York. Where the mercury falls from 15 to 25 degrees below zero, and where it has stood in open field culture for many years without the slightest protection, never being injured in the least.

In quality, it is exceptionally sweet, rich, melting and luscious, being without core. The canes are of exceedingly strong, upright habit, attaining upon fairly good soil a height of 8 feet, if permitted to grow unchecked, and are so stout as to always remain erect; foliage large, deep green, abundant and entirely free from blight or rust. Its season is early to midseason, ripening with the Snyder — in advance of Kittatinny, Lawton, Taylor’s Prolific, Eric, but not so early as the Early Harvest or the Wilson. A standard variety; one of the best. Price, 20c each; $1.50 per dozen; $5.00 per 100; $40.00 per 1,000.
WARD

We quote the description given below by a very prominent horticulturist who accompanied a committee from the New Jersey State Horticultural Society on a trip to the home of the Ward to look into the claims being made for it: "It was the most astonishing sight I have ever seen. Hedge rows were six feet apart, canes stood about 1 to 4½ feet high, and some 2½ feet wide across, and the tops were such a solid mass of green, red and black berries as to almost exclude the foliage from sight. The ripe ones were big, glossy black fellows, fully one-half larger than Snyder, rich, sweet, tender and melting, with no hard core at the center. One-third of an acre yielded 60 bushels. This made $644.00 per acre, which must have meant $350.00 per acre profit. The canes are very hard, never once having been known to winter-kill. A perfect Blackberry is Ward." Price, 20c each; $1.50 per dozen; $5.00 per 100; $40.00 per 1,000.

Rathburn The berries are large, larger than Kittletinny, of an intense jet black, very glossy, and of permanent color, never turns red, without any hard core, small seeds, extra fine quality, with a peculiarly rich aroma, and sufficiently firm to carry well to market. It is in habit of plant, however, that this variety differs from others. The plant suckers very little; it makes a strong, upright stem, from which the branches start out long and drooping, and the ends of which root readily in the ground, like Blackcap Raspberries, if covered lightly with soil. It forms a compact bush of four to five feet high, with canes much less thorny than other varieties, and yield abundantly. It ripens early—about with Wilson. All who want a large Blackberry of the highest quality should certainly try this. Price, 20 cents each; $1.50 per dozen; $5.00 per 100; $40.00 per 1,000.

Ohmer Originated by N. Ohmer, the veteran horticulturist, who also originated the Green Raspberry. Hardy, healthy, very large; ripening after others are gone, and lasting till late in August, when prices are up. Excellent quality; firm; no core. Five points will recommend this berry. Hardy, late, large, productive, and of the finest flavor; also brings 50 cents to $1.00 more a crate than Snyder or Taylor. As large as the largest; as hard as any other good berry; very productive; strong grower; finest quality, and late. Price, 20 cents each; $1.50 per dozen; $5.00 per 100; $40.00 per 1,000.

Ancient Britton One of the best hardy varieties. Very vigorous, healthy and hardy, producing large fruit stems, loaded with good-sized berries of fine quality that carry well and bring highest price in market. For general planting for home or market in all sections subject to severe winters, the Ancient Britton is recommended as a first-class variety. Price, 20c each; $1.50 per dozen; $5.00 per 100; $40.00 per 1,000.

Scarff's Fruiting Strain French Lawton Selected fruiting strain from the old Lawton, once so popular among fruit growers. We have improved this variety until its fruiting capacity is simply marvelous. The berry is long, juicy, little core, large size and glossy black color. Canes very strong, upright, forming tree shaped bushes, bears so full of fruit that it should be heavily mulched or well cultivated to furnish plenty of moisture to mature the great yield of fruit it is capable of producing. Price, 20 cents each; $1.50 per dozen; $5.00 per 100; $40.00 per 1,000.

Early King An extra early and exceed-

NEW CATALOG OF LANDSCAPE GARDENING

WE HAVE ISSUED A VERY FINE CATALOG ON LANDSCAPE GARDENING AND WHAT TO PLANT. IT IS WELL WRITTEN AND FINELY ILLUSTRATED, AND WILL BE OF GREAT VALUE TO THE PLANTER AND OWNERS OF FINE ESTATES. SENT FREE TO PERSONS INTERESTED IN ORNAMENTAL PLANTING. WE ALSO GIVE FREE TO EACH CUSTOMER A BOOK ON TRANSPLANTING AND CARE OF TREES, SHRUBS, ETC. IT IS A VALUABLE TREATISE.
Iceberg the White Blackberry

Strange as it may seem this is a real creamy white Blackberry. Mixed with the jet black ones for dessert it makes a most wonderful dish. The fruit is about the size of Snyder with few seeds and quite sweet when fully ripe. The bushes are good strong growers and very productive. This is not a worthless novelty but a fruit of real value, and should be in every garden. Price, 20 cents each; $2.00 per dozen.

Early Harvest

150 Bushels of "Scarff's Fruiting Strain Early Harvest" from one acre sold as high as $4.00 per bushel. The earliest to ripen and the most productive of the early sorts. There are a number of different strains of Early Harvest Blackberries, all alike in appearance of wood and growth, but vastly different in productiveness. We noticed this peculiarity soon after its introduction, and have, by careful system of selection, selected a strain that is simply marvelous for great yields of luscious fruit. We have not only increased the productiveness, but size as well, and now have an early variety that cannot be excelled, as it ripens so early that it always sells at enormous prices.

Price, Scarff's Fruiting Strain Early Harvest, 20 cents each; $1.00 per dozen; $4.00 per 100; $30.00 per 1,000.

Premo Dewberry

Much like Lucretia, but very distinct and exceedingly early, being seven to ten days ahead and all cleaned off when Lucretia is beginning. Quality and size uniform. Blossoms pistillate. Plant every fourth row Lucretia or Austin for best results. Was found in a Lucretia patch.

Price, 15 cents each; $1.00 per dozen; $4.00 per 100; $30.00 per 1,000.

Lucretia Dewberry

The berries are far larger and incomparably better than any blackberry, and of unequalled excellence; soft, sweet and luscious throughout; of brightest glossy black color. Price, $1.00 per dozen; $4.00 per 100; $30.00 per 1,000.

Austin Dewberry

Earlier than Lucretia, same size. 15 cents each; $1.00 per dozen; $4.00 per 100; $30.00 per 1,000.

Book on Transplanting

This book will be mailed free to each and every customer for 1922 free of charge. Sent immediately upon receipt of order.
Scarff's Currants
Have No Equal for Profit and Productiveness

No garden is complete without them. Easy to grow and sure to bear. Our list comprises only the very best in cultivation. Plant 3x6 feet. Use Paris Green or Helleborine for worms.

Red Cross
We have grown this variety for a number of years on our own Fruit Farm and find it one of the most profitable currants that we grow. It was originated by the veteran horticulturist, Jacob Moore who counted it one of his greatest achievements. In size it is equal to Fay or Cherry and will, we are sure, yield as much again as these old favorites. The quality is good and size of berries uniform. The red clusters are large, making it very easy to pick. Our pickers pack three crates a day of the Red Cross. It makes abundant wood growth, and is not much bothered by borers. Price, 30 cents each; $3.00 per doz.; $25.00 per 100.

Wilder
A remarkable variety for which we predict great popularity; both for table and market. One of the strongest growers and most productive. Bunch and berry very large, bright attractive red color, even when dead ripe; hangs on bushes in fine condition for handling as late as any known variety. Compared with the celebrated Fays, is equal in size, with longer bunch, better quality with much less acidity; ripens at the same time, continues on bush much longer; fully as productive, in some trials largely outyielding it. Price, 30 cents each; $3.00 per dozen; $25.00 per 100.

North Star
Has proved to be hardy wherever tried without a single exception. Single berries of the short-bunched Cherry Currant can be grown a larger size than the North Star, but the average bunches of the latter are much heavier, while in quality the fruit is less acid and more agreeable to eat out of the hand than the Cherry. In quality it is nearer the flavor of the Red Dutch than any other variety. Price, 30 cents each; $3.00 per dozen; $25.00 per 100.

Victoria
Larger; bunches long; berries bright red color, of excellent quality; bush good grower; extremely hardy. Perhaps this is the best of the old varieties of currants. Price, 30 cents each; $3.00 per dozen; $25.00 per 100.

Fay's Prolific
Perhaps no other currant has received so much praise as the Fay. It is very large, and always sells well and at high prices. We consider it does better on heavy clay soil, well mellowed and thoroughly cultivated, than on lighter soils. Price, 30 cents each; $3.00 per dozen; $25.00 per 100.

Perfection
Is a beautiful bright red. Size as large or larger than the Fay, the cluster averaging longer. The size of berry is well maintained to the end of the bunch. The Perfection has a long stem from point of attachment to the bush to the first berry, making it easy to pick without crushing any of the berries.

PRODUCTIVENESS. The Perfection is a great bearer, resembling its parent the White Grape in this respect; superior to the Fay or any large sort with which we are acquainted.

The SEASON OF RIPENING is about the same as that of the Cherry or Fay.

QUALITY. Rich, mild, sub-acid, plenty of pulp with few seeds. Less acid and of better quality than any other large currant in cultivation. The White Grape has always been considered one of the best varieties for table use, and the effect of this strain is plainly seen in the very fine quality of Perfection.

VIGOR AND HEALTHFULNESS. In habit of growth it is intermediate between the larger-fruited Fays and the compact currants. The bush is extremely healthy and very vigorous.

London Market
The home of this valuable currant is Michigan, where hundreds of acres of currants are grown for the Chicago markets. No other variety is so popular in that noted fruit section. The fruit is of good size, being larger than Victoria, Versatile, and North Star. It is enormously productive. The bush is healthy and holds its leaves until snow flies. We consider this variety to be one of the most profitable that a fruit grower can plant either for commercial purposes or for the home garden. It is an all around currant that gives universal satisfaction. The success of currant culture depends upon productiveness, size, and length of season, the fruit will remain in prime condition on the bushes. London Market has all of these strong points and you are certain to make no mistake by planting heavily of this variety. Price, 30 cents each; $3.00 per dozen; $25.00 per 100.

Pomona
The berry is medium to large, bright red and excellent quality. It hangs on the bush a long time after ripe, and is one of the best for shipping variety. It is anxious to pick and has a record of making a net profit of $461.00 per acre for three consecutive years on an acreage of $1/4. This perhaps is the best record of any currant grown. Price, good strong plants, 30 cents each; $3.00 per dozen; $25.00 per 100.

NOTE.—See quarantine regulations next page on Currants and Gooseberries.
SscarF’s Gooseberries

Our stock of Currants and Gooseberries is exceptionally fine and our varieties are the best, being hardy, prolific bearers and large fruit. May be planted either spring or fall.

We are just now beginning to realize the immense profits in Gooseberry culture. It is really amazing to learn of the great yields from a plantation that has been properly handled. A half bushel per bush is not an uncommon yield. The Rural New Yorker has published some remarkable records from plantations in New York and Indiana. We advise you to investigate this line of fruit growing and get started at once so you can reap the big profits in the early stage of the game.

Oregon Champion By the originator it is claimed to outyield Downing four to one and berries equal size. Compared with Houghton it is a heavy cropper and very easy to pick. The branches are willowy and drooping. The berries are a golden tint when ripe. Sweet and excellent quality. A distinct variety in fruit and growth. Price, 30 cents each; $3.00 per dozen.

Josselyn General favorite among fruit growers. Large size, pink color when ripe, smooth, prolific and hardy. Carefully tested everywhere and one of the most profitable to grow for market. Free from mildew in both leaf and fruit. Foliage healthy, bright and clean. Bush strong, upright grower. Price, 30c each; $3.00 per dozen.

IMPORTANT NOTICE
Owing to White Pine Blister quarantine no orders for Currants or Gooseberries will be accepted from following states:
Washington, Oregon, Montana, Idaho, Nevada, California, Wyoming, Utah, Arizona, North Dakota, South Dakota, Nebraska, Colorado, New Mexico, Kansas, Oklahoma, Texas, Georgia, New Hampshire, South Carolina, West Virginia.

Oregon Champion.

Pearl This is a very desirable American variety—a cross between Houghton and one of the large English varieties. It is very hardy, entirely free from mildew, superior in size and quality and more productive than Downing, and is likely to supersed this standard sort. From the many flattering testimonials of this new berry from most of the leading horticulturists we have pleasure in recommending this variety for small or extensive planting as one of the best berries of recent introduction. Price, 30 cents each; $3.00 per dozen.

Houghton Berries medium under ordinary care, but if thinned thoroughly in fall or spring, fruit will be greatly improved. Color is pale red; tender and good; plants make a spreading growth of rather slender wood; enormously productive. Price, strong plants, 30 cents each; $3.00 per dozen.

Downing A large, handsome fruit, green in color; fine flavor; immense cropper and always in demand at fancy prices. American variety, free from mildew; bush strong grower; wood thick and strong. Price, strong plants, 30 cents each; $3.00 per dozen.
Caco New Red Grape

A variety of exceptional merit and should be in every collection planted. It combines more good qualities than any other variety introduced in many years.

The Caco is perfectly hardy in all parts of the country. It has been pronounced by the best growers in America to be equal in quality to any variety grown either out of doors or under glass. It is the most beautiful of the hardy grapes, the bunches are large, well shouldered, color wine red with abundant bloom. Bunches are compact and of good size and form. Earlier than Concord and is sweet and palatable several weeks before it is fully ripe. The vine makes a very strong growth hence is valuable for covering trellis or screen. Caco is beyond doubt one of the best of our native grapes.

Price, 50c each; $5.00 per dozen.

WORDEN (blue). A valuable blue grape ripening from three days to a week before Concord. Berry large, of good quality; thin skin; very productive; vine a strong grower. The most popular black grape grown today. It comes in early enough to avoid the rush of Concors; thus brings 1 to 2 cents per pound more. Price, 30c each; $3.00 per dozen.

MOORE’S EARLY (blue). A large blue grape, ripening a week earlier than Concord; good grower; berries large, good quality, and makes a moderate yield, very valuable as an early grape. Price, 30c each; $3.00 per dozen.

NIAGARA (white). The most popular white grape in existence. Fruit large and very productive; a good grower; ripening same season as Concord; equally hardy; valuable in every way. Price, 30c each; $3.00 per dozen.

BRADFORD (red). One of the best red grapes in cultivation. Bunch large and compact; a good grower and very productive; quality good. Price, 30c each; $3.00 per dozen.

CONCORD (blue). An old variety, does well wherever planted; good size; productive. Price, 30c each; $3.00 per dozen.

MOORE’S DIAMOND (white). The color is a delicate greenish white, with a rich yellow tinge when ripe. Very few seeds, juicy, and almost entirely free from pulp, which makes it almost transparent. Berry size of Concord and two weeks earlier. Price, 30c each; $3.00 per dozen.

CHAMPION (blue). One of the earliest to ripen, practically free from rot or other disease, strong grower, compact bunches, quality fair size medium. It succeeds anywhere, and is good for covering arbor. Price, 30c each; $3.00 per dozen.

WYOMING (red). A popular market sort. Berry small; quality good; very productive and hardy, resembling Delaware somewhat; valuable for home use or market. Price, 30c each; $3.00 per dozen.

Campbell’s Early Large blue Grape. Very fine quality. Price, 40c each; $4.00 per dozen.

AGAWAM. Deep red, large bunch, berries large, meaty with rich aromatic flavor. Ripes a little after Concord. Price, 30c each; $3.00 per dozen.

CATAWBA. The leading red grape in commerce; very attractive. Ships and keeps well. Price, 30c each; $3.00 per dozen.

Grape Collection

We can send, postpaid, one vine each of Concord, Worden, Moore’s Early, Diamond, Brighton, Wyoming and Champion, strong 1-year for $1.50; strong 2-year for $2.50.
Our Novelty Fruit Collection

Different from ordinary fruits, and should be planted by everyone loving rare specimens. They are of but little value for commercial purposes. Plant in a small way only as Novelties and they will surprise and well repay you.

Strawberry-Raspberry Valuable for the extreme North, as the fruit is borne on the young growth, and is of course hardy in any climate. This is an entirely new fruit, both in habit of growth and form of fruit. Bushes grow 1 to 3 feet high, and are covered with red berries in the shape of strawberries. They are upright in manner of growing. Perfectly hardy, bound to become a valuable addition in the fruit line. It is very productive and a distinct novelty in small fruits. Price, 15 cents each; $1.50 per dozen, postpaid.

Japanese Wineberry Ornamental both in fruit and plant. Canes covered with purplish red hairs. Fruits in large clusters and each berry at first tightly enveloped by the large calyx, forming a sort of burr, which is covered with purplish-red hairs. These gradually open and turn back, exposing beautiful wine-colored fruit of medium size, rich sub-acid, retaining flavor when cooked; highly esteemed for canning, preserves, jellies, etc. Price, 25 cents each; $2.50 per dozen, postpaid.

Improved Dwarf Juneberry A good substitute for the large or swamp huckleberry, or whortleberry, which it resembles in appearance and quality. The fruit is borne in clusters, and is reddish-purple in color, changing to a bluish-black. In flavor it is mild, rich sub-acid; excellent as a dessert fruit or canned. The bushes are extremely hardy, enduring the cold of the far North and heat of the far South without injury. When this fruit becomes better known to the public it will be very popular. It is much larger and better flavored than the Wild Juneberries. Price, 25 cents each; $2.50 per dozen.

Himalaya Berry A new freak in horticulture which has caused a great furor among fruit growers. Extravagant claims were made for it by the introducer, but with us it is a failure. We have genuine plants from the introducer and if you want to try it we will be glad to furnish them to you; but, if you expect any great thing from the Himalayas, then we say go slow. Price, 20 cents each; $2.00 per dozen, postpaid.

The Loganberry A hybrid between the Raspberry and the Blackberry. The fruit is as large as the largest Blackberry, and is produced in immense clusters. The color is a clear, dark red. It partakes of the flavor of both the Blackberry and the Raspberry—mild, pleasant, vinous flavor, delicious and peculiar to this berry alone. Seeds small, soft and few. Berries very firm, and carry well. Strong grower; enormous bearer. Fruit ripens early, just after strawberries. Not hardy north of 40th parallel without protection. Price, 50 cents each; $5.00 per dozen, by mail, postpaid.

Huckleberry Many persons prize the fruit of the Huckleberry above any other for pies. and they can be grown successfully in most parts of the U. S. They love a cool, moist soil.

Elderberry This valuable fruit is becoming more popular each year. The fruit is fine for pies and to can for winter use. They may be planted anywhere about the yard, garden or field. The bush is highly ornamental and attractive when in bloom, and equally so when it is bending down with luscious fruit in early autumn. Price, 50 cents each; $3.00 per dozen.

The Phenomenal Berry Originated by Burbank; berries very large, of a bright crimson raspberry color; very productive. Berries in large clusters of from 5 to 10 and somewhat larger than the Loganberry, to which it has a close resemblance. Price, 50 cents each; $5.00 per dozen.

Hubam The new annual sweet clover—see page 29. This is one of the most wonderful and valuable discoveries of the century. It will add more money to the farmer's income than any crop grown. It does in one year what other CLOVERS do in two. Our seed is absolutely reliable, certified, right in every way. Equally valuable for the farmer, gardener, poultryman and fruit grower. Special circular on Hubam Clover mailed free on application. Price large pkt., 25c; ½ lb., $1.00; 1 lb., $1.50; 10 lbs., $12.50; bu. (60 lbs.), $75.00.
GREAT CROPS FROM LITTLE TREES

DWARF FRUIT TREES

SOLVE THE PROBLEM OF FRUIT GROWING IN SMALL GARDENS.

For centuries the dwarf fruits have been grown in Japan, and for many years in Europe, but only in recent years have they attracted much attention in our own country. The trees do not attain the size of standard stock, therefore are better suited for suburban plantings, where space is limited; they can be planted closely, enabling the grower to have more of them and get quick results as they begin bearing in 2 or 3 years if carefully planted and cared for.

DWARF APPLES

Dwarf Apples are grown by grafting on Paradise stocks.

Perhaps no other fruit is attracting so much attention at the present time as Dwarf Apples, especially for garden and yard planting. They can be planted 6 feet apart and do well. They begin to fruit the second or third year, and bear abundant crops. The fruit is just as large, same flavor, etc., as that borne on the standard trees. The great advantage is the early bearing of fruit. The trees never get over 6 or 8 feet high. Very profitable, bear 4 to 6 bushels per tree.

WE CAN SUPPLY THE FOLLOWING CHOICE DWARF KINDS: BISMARCK, KING, BALDWIN, HUBBARD'S NONSECH, NORTHERN SPY, WAGENER, WEALTHY, McIntosh. TRY A DOZEN OR MORE TREES, AND GATHER FRUIT FROM THEM IN A VERY FEW YEARS. PRICE, 3 FOOT TREES, $1.00 EACH; $10.00 PER DOZEN.

Bismark Dwarf Apples

Tree of short, stocky growth, thick, healthy foliage; makes beautiful specimens. It can be grown in pots for decorative purposes. Fruit large, handsome, yellow, sometimes shaded red cheek; flesh tender, sub-acid. Entirely new in its remarkable quality of producing crops on young trees, seldom failing to bear when two years old. Price of trees, $1.00 each; $10.00 per dozen.

DWARF PEARS

May be planted 6x6 feet, and they will begin bearing in a very few years. The Dwarf Pears are grown by budding on Quince stocks.

The following varieties are particularly recommended for cultivation.

All are vigorous, and handsome growers, hardy and productive.

KOONCE
KEIFFER
SECKEL
WILDER
BARTLETT
CLAPP'S FAVORITE
DUCHESS
FLEMISH BEAUTY

Price of Dwarf Pear trees, three feet high, each, $1.00; $10.00 per dozen.
The New
Ensee Apple

Seedling of Rome Beauty
A New Variety That Promises to Become More Popular Than Its Parent

Larger, Better Colored, More Juicy and is More Widely Adapted Than the Rome

**ORIGIN.** The Ensee Apple originated on the farm of the late Nelson Cox in Lawrence Co., Ohio, and began to bear good crops as early as 1885. Since then it has grown more in favor as a family apple for dessert and cooking, and as a commercial variety it has stood in the front rank wherever it has been marketed. In Cincinnati it sold for one or two dollars more per barrel than Rome Beauty and people would not buy Romes as long as they could get the Ensee after they got a taste of it and learned its quality.

**DESCRIPTION.** The trees bloom about the same time as Grimes Golden and both buds and bloom will stand frost much better than the average. One year the old tree was full of bloom when the temperature was down to 20 degrees and still there was a fair crop of Ensee.

In the Northern Apple sections the Ensee is much better adapted than the Rome Beauty as it does not scab so badly and colors earlier. It hangs to the tree well after colored and keeps well in storage, retaining its crisp, juicy texture, and does not become dry and mealy as does the Rome.

We can highly recommend this new Ensee Apple for both home and commercial orchards. Its merits have made it one of the most promising apples introduced and we hope you will plant at least a few trees to try it out. You will be more than satisfied with the results. **Large trees, $1.00 each; $10.00 per dozen. Small trees, 15c each; $8.00 per dozen.**

**New Giant Flowering Marvel Mallow**

The large showy flowers of this new mallow average five to six inches in diameter. They start blooming the latter part of July, when flowers are quite scarce, and continue for over a month. This is a perennial that is perfectly hardy and thrives in either wet or dry soils. We are sure you will like it. We can furnish this in three colors, white, pink and red. **Price, strong roots, 25c each; $2.00 per dozen.**

**Kudzu Vine**

This very luxuriant, rapid growing vine is of Japanese origin and is becoming very popular both as a quick growing ornamental vine or screen for porches, lattice work, etc., and as a forage crop for cattle and hogs. The vines make a growth of 40 to 60 feet in one season, furnishing an abundance of pasture. It forms a tuberous root which is hardy everywhere and as it is a legume just as Soy Beans or Alfalfa, it acts as a soil rejuvenator by adding nitrogen. We hope you will give this new plant a thorough tryout and we are sure you will be greatly amazed at its wonderful qualities. **Price, strong roots, 15c each; $1.00 per doz., $7.50 per 100.**
APPLES
Standard Size Trees
Price of extra good trees, 75 cents each; $8.00 per dozen; $60.00 per 100.

Summer Varieties

YELLOW TRANSPARENT. Of a pale lemon cast, smooth skin; very good; the earliest apple to ripen and a fine market sort. Best of the early varieties. Bears very early; often fruits in the nursery row at 3 years old. Be sure to include it in your collection.

DUCHESS OF OLDENBURG. Yellow striped with red; very good; a profitable variety on account of its productiveness. Autumn.

Wealthy. Tender, juicy, red striped. Heavy producer.

Red Astrachan. Large, of crimson hue; beautiful, somewhat acid; withstands winter well; early.

Early Strawberry. Medium size; roundish; excellent quality; productive. Ripens in July.

Fall Varieties

FAMEUSE (Snow Apple). Size medium; roundish, striped with deep red on a white ground. Flesh white, tender, juicy; vigorous grower. October.

MAIDEN BLUSH. An extra mid-autumn variety; whitish yellow with carmine cheeks; excellent quality.

RAMBO, WOLF RIVER, GRIMES GOLDEN, JONATHAN.

Winter Banana Apple

This valuable new apple is a surprise to all who eat it, owing to the decided banana flavor and taste it imparts, besides it comes into bearing in two years from planting, and continues to produce full crops each succeeding year. The fruit is large, perfect in form, golden-yellow, beautifully shaded and marbled with bright crimson. Flesh lemon-yellow, creamy texture like a well-ripened fall pippin, rich, of highest quality and a good keeper—from November until May. Tree a remarkably strong grower, of ironclad hardness, with a large foliage that never blights or mildews, and produces enormous crops every year.

McINTOSH RED. Hardy Canadian Apple. Medium, nearly covered with dark red; flesh white, fine, tender, juicy. Good annual bearer. November to February.

GREENVILLE or WINTER MAIDEN BLUSH. This variety is identical with Fall Maiden Blush, except in time of ripening and keeping qualities. It being a winter apple and a splendid keeper, the value of such a variety cannot be overestimated. This fine apple was produced from seed of the Fall Maiden Blush by Jason Downing, in Darke County, Ohio, in the spring 1874. It made a vigorous growth, and at the age of seven years it bore excellent fruit, from which time it produced fruit annually. In 1888, at the age of fourteen years from seed, it yielded 15 bushels of picked apples.

Delicious. Introduced in the West several years ago. No new variety has ever so quickly gained popularity in so many different apple sections of our country. Fruit large, nearly covered with brilliant dark red; flesh fine grained, crisp and melting, juicy, with a delightful aroma; of very highest quality. A splendid keeper and shipper. Tree one of the hardest, a vigorous grower, with good foliage. A regular annual bearer.

BALDWIN. Dark red; medium to large; slightly acid. Very popular on account of its flavor and shipping qualities. Early winter.

BEN DAVIS. Very large, red striped; not extra quality, but a good yielder, and sells well in market. Early winter.

CRAB APPLES

Varieties—Hyslop, Whitney, Transcendent. Price, 75¢ each; $8.00 per dozen.
The medium melting, cheek a flesh rich. This healthy and a good bearer. Early June.

Yellow Spanish
Very large, yellow and rich; a popular variety. Is of Spanish origin. Sweet.

Dyehouse In wood and fruit, it shows a percentage of both Morello and Duke. Bears early and is a sure fruiter. A week earlier than Richmond. Valuable for preserves.

Early Richmond
Dark red; medium size; very popular. A standard and time-tried variety. Early May market.

Cherries
A Good Commercial Cherry Orchard Pays Big Profits.
Price, fine trees, 5 to 6 feet, well-headed and good roots, $1.25 each; $12.00 per dozen.
Gov. Wood One of the best sweet cherries. Large, light red, juicy and delicious. Tree healthy and a good bearer. Early June.

Montmorency
Larger than Early Richmond, about ten days later, and is probably the best and most paying variety in cultivation for market. No better time than now to plant Cherry trees, as the demand was never better for good fruit.

Standard Pears
Prices, except where noted, fine trees. $1.25 each; $12.00 per dozen.

Seckel Small, skin rich, yellowish brown when fully ripe, with deep brownish red cheek; flesh very fine grained, sweet, exceedingly juicy, melting in the mouth.

Duchesse Very large, buttery, rich, juicy, excellent. It succeeds to perfection and is the most popular market variety as a dwarf.

Koonce This pear ripens about two weeks earlier than Early Harvest. It is not quite as large as Early Harvest but of much better quality, and does not rot at the core, as Harpers often do. The fruit is straw color, with red cheek, dotted with brown dots. Tree a vigorous grower; healthy foliage; is very hardy in bud and bloom.

Wilder Early The claims of this pear are early ripening, productivity, high quality and healthy growth; also long keeping qualities.

Bartlett Size large, with blush next the sun; quite juicy; excellent flavor; fruits when quite young. One of the most popular. July and August.

Clapp’s Favorite Quite large; from green to yellow color, covered with russet specks; rich. July and August.

Vermont Beauty It is very vigorous, the leaves free from blight. It is an annual and abundant bearer. In quality the fruit approaches nearer that most delicious pear, the Seckel, than any other pear on the market. It is full-medium size, yellow, covered on the sunny side with bright crimson-red; flesh melting, rich, juicy, aromatic. Ripening with and after Seckel, though much larger in size and more attractive in appearance; it cannot fail to prove a general favorite and very valuable.

Tyson Size medium; cheek reddish-brown; melting, sweet, excellent. August.

Idaho A chance seedling and a noteworthy variety. Will withstand a temperature of 30 degrees below zero. Its size and appearance somewhat resemble the Chinese Sand Pear, but it is far superior to it for eating. It is among the best pears in cultivation. Large, handsome, small core. October.

Kieffer’s Hybrid An offspring of the Sand Pear and Bartlett; a very ornamental variety, owing to its beautiful foliage. Bears very young, often fruiting in the nursery row. Fruit never rots at core. September and October.

Rossney Ripens two weeks after Bartlett; it is an excellent keeper and shipper, with tree much stronger than Kieffer. In general appearance it somewhat resembles Bartlett, but is more round. It is very seldom you can find a single variety combining so many rare qualities as this does, and we have great pleasure in offering it as the best pear on the market.
Mayflower Peach  Practically frost-proof—it blooms very late and blossoms are very large, thus quite safe from damage by ordinary frost. Safe and sure for planters everywhere. This new peach originated in North Carolina, and is the earliest peach in existence; besides its color is perfectly red, which makes it one of the best and most profitable market sorts in existence. It is perfectly hardy, an abundant cropper, and should be in every home collection of fruit whether for the home garden or for commercial purposes. Our stock comes from the originator, and can be relied upon as being genuine and first-class in every respect. Mayflower is a cling peach. Price, good trees, 60 cents each; $6.00 per dozen; mailing size, 50 cents each; $5.00 per dozen.

STANDARD PEACHES

Prices, except where noted, 4 to 5 feet, good trees, 60 cents each; $6.00 per dozen; $45.00 per 100.

CROSBY. Valuable especially for the unusual hardness of its fruit buds. Medium; bright yellow, with crimson splashes and stripes; very attractive; flesh bright yellow; red at the pit; juicy, rich. An abundant and regular bearer. Ripens before Crawford's Late.

CHAMPION. Originated in Illinois. Very large, specimens having measured ten inches in circumference; skin creamy white, with red cheek; very handsome; will fruit under trying conditions. August.

CRAWFORD'S EARLY. One of the best early yellow peaches. Fruit large; yellow with a blush cheek; very beautiful and productive. Last of July.

ELBERTA. Quite as popular as Crawford's Early. The best peach grown.

OTHER GOOD VARIETIES—Early Canada, Crawford's Late, Elberta, Foster, Globe, Mountain Rose, Old Mixon Free, Schumacher, Steadley, Stamp the World, Salway, Smock Free, Carman, and Alexander.

Plums

Prices, good trees, $1.25 each; $12.00 per dozen.

MOORE'S ARCTIC. Very hardy; a prolific bearer; dark purple; flavor fine.

NIAGARA. Large; reddish purple; green bloom, resembling Bradshaw.

SHIPPER'S PRIDE. A large blue plum; very hardy and productive; esteemed for market.

REINE CLAUDE. Bavey's Green Gage. Very large, greenish; fine flavor.

GERMAN PRUNE. A valuable plum of fair quality for dessert, but most esteemed for drying and preserving. Long-oval purple with a thick blue bloom; flesh firm and pleasant, separate from the stone. Moderate to vigorous in growth. September.

BRADSHAW. Very large fruit; dark red; flesh inclined to yellowish-green.

LOMBARD. Size medium, dark blue; sweet, good. A variety valuable for market. A great producer of fine blue plums. Most popular variety of blue plums grown.

ABUNDANCE. A very early bearer, it often bears fruit in the nursery row. It bears such loads of fruit that it is often necessary to prop the limbs to keep them from breaking. Fruit large, beautiful, and of an amber color. Flesh yellow, tender, sweet.

RED JUNE. A vigorous, hardy, upright, spreading tree as productive as Abundance, with fruit equally as large. Small pit, juley, reliable bearer.

BURBANK. It is one of the most promising of any variety of Japanese origin. Vigorous, strong branches. Fruit almost curculio-proof. A good shipper. June.

HARRIS HARDY APRICOT. The fruit is fully as large as the best Apricot grown in California, and so much better in quality as to make and hold a place in the market against the very best from California. Price, $1.25 each; $12.00 per dozen.

NECTARINE. A very delicious, smooth skinned fruit, which thrives wherever peaches will grow. Price, $1.00 each; $10.00 per dozen.

---

**American Elm**

(Ulmus Americana.) This well-known tree ranks among the very best for avenue or park, especially in deep or wet soil. It grows rapidly and makes tough branches, rarely being damaged by wind or snow. Its spreading head, drooping branches and stately growth, give it the name of the “Monarch of the Forest.” Price, 10 to 12 feet, $1.50 each.

**American White Ash**

A tall, broad-headed tree, reaching a height of 120 feet. A handsome, hardy, quick-growing shade tree. Very valuable in all landscape work for park, shade or street planting. 8 to 10 ft., $1.50 each.

**Red Bud - Judas Tree**

A handsome ornamental tree, growing 20 to 30 feet high. It has a broad, irregular head and perfect heart-shaped glossy leaves. Beautifully attractive in early spring when the leafless branches and twigs are covered with rosy-pink blossoms. Very beautiful and attractive planted as single specimens or in groups. Price, 4 to 5 feet, 50 cents each.

**Norway Poplar**

This variety has just come into prominence lately because of its marked superiority over the other similar varieties of this family of trees. It grows very rapidly and has been known to attain a height of 50 feet with a diameter of 17 inches in 14 years. Growth is tall and straight, makes a good shade retaining its leaves until late in autumn, and on account of the rapid growth it makes an excellent wind break. The wood is straight grained and suitable for lumber. Splits easily, seasons quickly and makes excellent fuel. Price, 8 to 10 feet, 75 cents.

**Catalpa Bungei**

(Umbrella Catalpa.) Grafted on stems 6 to 8 feet high, it makes an umbrella-shaped top without pruning. Perfectly hardy; and flourishes in almost all soils and climates. Leaves large, glossy, heart-shaped, deep green; lie like shingles on a roof; always making a symmetrical head. One of the most unique trees, a valuable acquisition for lawn, park, and cemetery planting. 6 to 8 feet, each, $2.00.
Ornamental Shrubs

Nothing will add more to the value and beauty of your home than a few of our beautiful flowering shrubs planted around the house and in the lawn.

Spirea Van Houttei

In making a house and lawn attractive there is no better shrub than the Spirea Van Houttei. It is a plant growing about five feet high, with delicate leaves and clusters of white flowers. This shrub can be used in groups or in hedges with very good effect. The Spirea Van Houttei is one of the very best hardy plants for an ornamental hedge, or for artistic groupings, and it will bear clipping into compact form, as well as any shrub. **Price, for large plants, 35c each; $4.00 per dozen; $25.00 per 100. Lighter stock for hedging, 18 in. to 2 ft., $25.00 per 100.**

Plant at least half dozen of these beautiful white flowering shrubs about the lawn, and they will repay you a hundred fold.

Summer Lilac

(Butterfly Bush.) This rare new flower is attracting attention everywhere by flower lovers and should be in every collection. It begins blooming early in summer and continues without check until the middle of October. The flowers are valuable for cutting for market, and have the fragrance of the old-fashioned Lilac. **Price, for strong plants, 35 cents each; $4.00 per dozen, postpaid.**

Spirea Anthony Waterer

Produces showy panicles of red bloom from June until late fall. Low growing and very desirable for in front of higher shrubbery or used alone around the foundations. This is a beautiful little shrub and is especially admired for its persistent bloom throughout the late summer season when most other flowers have gone. **Price, 35 cents each; $4.00 per dozen.**

Golden Bell - Forsythia Suspensa

You have noticed these graceful sprays of golden yellow flowers—about the first to bloom in the spring—that push themselves into the sunlight long before the leaf buds have burst. Branches have a tendency to droop, making a beautiful specimen shrub or may be planted in a group with other shrubbery. **Price, 35c each; $4.00 per dozen.**

Syringa

(Mock Orange.) Flowers large, fragrant, snow-white, very popular shrub. Blooms in June. Each, 35 cents.

BARBERRY, WEEGELA, VIBURNUM (Japanese), Common Snowball, 35 cents each.

Calycanthus

Carolina Allspice, or Sweet Scented Shrub.

Large, glossy, green leaves. Flowers chocolate colored in early spring, having a rich, spicy, aromatic odor, filling the air with a delicate perfume especially in early morning and late evening when the dew is on the grass. **Price, 35 cents each; $3.00 per dozen.**

Deutzia

DEUTZIA GRACILIS. Small dwarf shrub 1 to 2 feet high, covered with white bloom in early spring. Excellent for foundation planting where a low shrub is desired. **Price, 35 cents each; $3.50 per dozen.**

DEUTZIA PRIDE OF ROCHESTER. Shrub attaining a height of 4 to 6 feet, producing large clusters of white bloom in early June. The foliage effect is good and it is a strong grower. **Price, 35 cents each; $3.50 per dozen.**
Hydrangeas

AMERICAN "EVERBLOOMING" (Hills of Snow). This new American Hydrangea is believed to be the most beautiful hardy flowering shrub introduced during the last twenty years. The plant, which attains a height of five or six feet, with near the same breadth, is by far more graceful in habit than the old form, with large trusses of beautifully formed flowers of dazzling whiteness, rendering this a plant of peerless beauty. It seems to thrive in various soils, and when fully exposed to the sun as well as in partial shade. The profusion of bloom of this new Hydrangea is very unusual. There have been counted 100 good trusses on one plant—trusses 7½ inches in diameter. Price, 35 cents each; $4.00 per dozen.

HYDRANGEA PANICULATA GRANDIFLORA has been very popular for thirty years or more, and millions of plants have been delivered to pleased customers the world over, and sales were never larger than at the present time. Price, strong plants, 35 cents each; $4.00 per dozen.

Althea - Rose of Sharon

(Rose of Sharon.) Strong, erect growing shrubs of the easiest culture, which bear large and showy flowers in early fall. Very desirable as an ornamental hedge on account of flowering when few other shrubs are in bloom. Each, 50 cents; $3.00 per dozen.

Red Twig Dogwood

(Cornus Alba Siberica.) A very hardy, thrifty shrub, doubly attractive because of its creamy white flowers in early summer followed by clusters of white berries and its very conspicuous blood red branches through the winter. Price, 35 cents each; $4.00 per dozen.

White and Purple Lilac

An old fashioned shrub which will never lose its popularity. Price, 30 cents each; $3.00 per dozen.

Snowberry

The bloom of this valuable shrub is rose colored and shows to best advantage in June; however, the prime beauty is its milk-white fruits which remain on the bush the entire winter. The combination of pink flowers and white berries on the same twig is charming. Price, 35c each; $4.00 per dozen, postpaid.

Indian Currant

Similar to the Snowberry except that its fruits are red, and that the smaller red berries cluster in thick ropes along the weighed-down stems. These two companion plants should be in every collection of hardy shrubs. They are especially desirable as they thrive luxuriantly even in shady places where most other plants become shaggy and unsightly. Price, 35 cents each; $4.00 per dozen.

Yucca

A hardy evergreen plant with long, narrow leaves that are bright green the whole year. The flowers are creamy white, bell-shaped, produced on long spikes 5 to 4 feet high. Fine, stately lawn plant. Good strong plants, 20 cents each; $3.00 per dozen.
Barberis Thunbergii—Thunberg's Barberry.

Berberis - Barberry

BERBERIS THUNBERGII (Thunberg's Barberry). A most beautiful dwarf Barberry from Japan. Changing in autumn to beautiful tones of orange, scarlet, and crimson. Yellow flowers produced in early April, followed by red berries which are produced in great profusion and which last the entire winter. Leaves retained for a long time. Makes a most beautiful and conspicuous low-growing hedge, and one that is specially suited for making boundary lines. In this ever-changing habit of this variety of Barberry lies its great charm and beauty, as each day sees some new development. It fits in anywhere and everywhere and always looks fine, and at the foundation of the house or porch, along the side of walks, in front of any tall-growing shrubbery, or as an individual plant on the lawn it is always in keeping with its surroundings. It is of low, dense, horizontal growth, graceful in all its branches. A favorite shrub and is becoming more popular each season. Absolutely hardy wherever planted. Price, 35 cents each; $3.00 per dozen, large plants. Hedge size, $15.00 per 100.

Scarff's Beautiful Privet Hedge

CALIFORNIA PRIVET HEDGE. One of the most beautiful plants for hedge in existence. There is no other hedge plant that will equal the California Privet for the purpose, becoming more beautiful each year. A quick, strong growing shrub, yet easy to control by use of shears or knife to any desired shape. Fine for hedges between the city lots, on large rural grounds, parks, cemeteries, in single clumps with other shrubs, also as screens to outbuildings, fences, etc. Very easy to grow on all soils, even in partial shade; almost evergreen, its rich, leathery, green foliage turns to purple in winter. $1.50 per dozen, by mail, postpaid. By express, $5.00 per 100; $50.00 per 1,000.

AMOOR RIVER PRIVET HEDGE. Oblong, glossy, green foliage, half evergreen; will grow to 15 feet if not trimmed and is absolutely hardy. $2.00 per dozen; $10.00 per 100.

IBOTA PRIVET. This perfectly hardy privet is popular on account of its spreading habit. The branches run horizontal from the main stem, then gracefully droop toward the ground. $2.00 per dozen; $10.00 per 100.
Hardy Ornamental Climbing Vines

All Sent Postpaid.

AMPELOPSIS VEITCHI (Boston Ivy), 50 cents each; 5 for $2.00.
CHINESE MATRIMONY VINE. 15 cents each; $1.50 per dozen.
CLEMATIS (Assorted Varieties). 50 cents each, postpaid.
VIRGINIA CREEPER, 25 cents each; $2.00 per dozen.
PURPLE WISTARIA. 50 cents each; $5.00 per dozen.
CHINESE WHITE WISTARIA. Silvery white. Same price as Purple Wistaria.
CINNAMON VINE. Produces tiny white, fragrant flowers. Strong roots, 10 cents each; 3 for 25 cents.

HONEY Suckle. Sweet scented and almost evergreen. Price, 30 cents each; $3.00 per dozen.
SCARLET HONEY Suckle. Foliage beautiful glossy green in strong contrast with the bright red, trumpet-shaped bloom. Strong and thrifty grower. 30 cents each; $3.00 per dozen.
TRUMPET FLOWER. From the old garden. Flowers perfect, trumpet-shaped, bright scarlet. A rapid grower; one of the finest vines for covering old stumps, fences, trellises, etc. Blooms almost continuously through the summer. 25 cents each; $2.50 per dozen, postpaid.

Christmas or Jerusalem Cherry

House plant prized for the large red berries which it retains most of the winter. Strong plants from 3 inch pots, 25c each; $2.00 per dozen, postpaid.

Ornamental Grasses

Beautiful for lawn and borders. Two leading varieties, Eulalia Japonica and Zebrina Variegated.

Good strong clumps, 35c each.
RIBBON GRASS. Good strong clumps, 25c each; $2.00 per dozen.

New American Mulberry

An everbearing variety ripening from middle of June until the middle of September. It forms a handsome shade tree, and is much hardier than the Downing and is a heavy annual bearer of large, sweet, delicious and refreshing berries that do not have the mawkish sweetness of most varieties. Delightful for making pies, dumplings and puddings. 5 to 6 ft., 75 cents each; $8.00 per dozen. Mailing size, postpaid, at the same price.

DOWNING EVERBEARING MULBERRY AND RUSSIAN MULBERRY. Same price.

Plant a few Russian Mulberry Trees for the birds. They will fruit a long time and birds eat them in preference to Cherries.

Extra Early Ohio Seed Potatoes

We have a choice lot of extra early Ohio seed potatoes that are well graded and extra choice tubers. Price, pk., 75c; bushel, $2.50.

IRISH COBBLER. One week later than Early Ohio. Heavy yielder, good seller and very profitable to plant. Price, pk., 75c; bushel, $3.50.

Potato Eyes by Mail

POSTPAID.

For several years we have been furnishing our customers good sound potato eyes by mail. It saves high freight and allows you to get a start of new varieties for a mere nothing. These potato eyes give the very best of satisfaction. Remember they come by mail, postpaid, and sure to grow. Try our new kinds. At a very small expense you can grow an experimental patch for exhibition. It is very interesting and profitable. 75 eyes should produce a bushel or more of good sound potatoes, any variety.

Varieties we can supply: Six Weeks, Early Ohio,

Irish Cobbler, Rural New Yorker, Seneca Beauty, Carman No. 3, and Petoskey.

Evergreens

We have a fine collection of dwarf Evergreens for foundation and specimen planting.

Globe Arbor-vitae A compact slow growing little Evergreen with almost a perfect globe shape. Strong, 15 in. plants, $1.25 each.

Tom Thumb Arbor-vitae Fine foliage turning bronze in winter. Growth compact and roundish in shape; very popular. Strong, 15 in. plants, $1.25 each.

Savin Juniper Dwarf and upright spreading in growth. Foliage beautiful dark green. Strong, 15 in. plants, $1.25 each.

Juniper Pfitzeriana A beautiful low spreading informal Evergreen, with bluish cast foliage, strong, thrifty grower and is considered the best where low horizontal growth of this nature is desired. Strong, 15 in. plants, $1.25 each.

Pyramidalis Arbor - Vitae An upright grower, pyramid in shape, much used in foundation and other evergreen plantings around the home where a good slow growing evergreen is desired. Small size, 12-15 in., $1.00 each; large size, 2-3 ft., $2.00 each.

Retinospora Plumosa Japanese Cypress

The beautiful plume-like foliage of delicate shade of green together with its strong compact growth has made this a very popular evergreen. It mixes well with other evergreens and shrubs or may be planted alone as a specimen. Strong, 15 in. plants, $1.00 each.

Dwarf Evergreen Box This is a hardy plant which can be used as edging along the walk, around your flower bed, and in porch boxes or as individual specimens in pots. Price, 50c each; $5.00 per dozen.

Norway Spruce The most largely planted and the most popular of all Evergreen trees. Often employed for ornamental and hedge planting, for screens and for windbreaks. Used largely for Christmas trees. Strong, 1½ ft. plants, 75c each.

Mahonia - Holly Leafed

Mahonia

A beautiful low-growing Evergreen shrub with glossy green leaves very much resembling the holly, and in the spring they bear great heads of small yellow flowers followed by showy clusters of blue-black berries. This is an excellent shrub for ornamental planting to add color and interest in winter. Price, 50c each; $5.00 per dozen. If you desire roots balled with earth, 10c extra.
Scarff’s Superb Iris

The Iris is one of the easiest to grow of all the floral family. They will thrive year after year with perfect abandon and neglect. At the same time they respond quickly to good soil and clean culture. Give them plenty of water during the blooming period, after that little or no water except the natural rainfall is needed. They are perfectly hardy anywhere and can be planted at almost any season of the year. Spring and fall, however, is the best season for planting. They bloom during May and June.

FLORENTINE. One of the earliest. Plant exceptionally thrifty and prolific in bloom. Leaves remain green most of the winter. Excellent for border plantings. Flowers large, rich violet purple. Price, 20c each; $2.00 per dozen.

CELESTE. One of the finest varieties. Beautiful fragrant flowers, self colored pale sky blue. Very loose boreem, tall habit. Price, 25c each; $2.50 per dozen.

GOLD COIN. Deep golden yellow with falls of rosy purple. Low growing, medium early. Price, 20c each; $2.00 per dozen.

MME. (HEREAU. One of the best, strong and beautiful. White elegantly frilled with wide border of clear blue. Very fine. Price, 25c each; $2.50 per dozen.

FLAVESCENS. Early, flowers self colored, very pale yellow. Medium height, fragrant. Price, 20c each; $2.00 per dozen.

LEONIDAS. Rich, dark velvety purple. A splendid flower with broad standards and long drooping falls. Price, 25c each; $2.50 per dozen.

GRACCHUS. Late, medium height. Standards yellow with falls of light wine. Price, 20c each; $2.00 per dozen.

This collection of Iris is one of the finest and most satisfactory to plant and will give great returns in beauty and pleasure. All postpaid at price named.

SIBERIAN IRIS. Deepest blue. The most elegant and delicate of the Iris family. The foliage is narrow sword shape, beautiful green color. The flowers are clear deep blue and bloom in great profusion. A border of this variety or even a single clump commands the admiration and attention of everyone. No collection is complete without our beautiful strain of indigo blue Siberian Iris, Price, 25c each; $2.50 per dozen.

Peonies - Queen of Perennials

FESTIVA MAXIMA. Very large, globular rose type. One of the largest white varieties, center flecked with crimson. Queen of all the peonies. Very tall, strong grower. Fine for cut flowers. Undoubtedly the most popular white in existence. 50c each; $5.00 per dozen.

FRAGRANS. Dark pink, medium size, compact and tall; fragrant, strong, vigorous grower. Price, 50c each; $5.00 per dozen.

MIXED VARITIES. Pink and white. Strong divisions, 30c each; 4 for $1.00.

Hardy Phlox

Price, Strong plants, 35c each; $3.00 per dozen.

BRIDESMAID. White with pink center. One of the best, strong thrifty growers.

ROSENBERG. Reddish violet, profuse bloomer.

ÉCLAIR. Rose color.
CARFF'S Superior
SEED CORN

We are, through most careful breeding and selection, producing exceptionally heavy yielding strains of corn on our farms. We know the cost of producing a poor crop is equal to a good one. Thus we have spent considerable time and money trying to produce seed that would increase our yields. We have succeeded and are pleased that we can give our customers the advantage of our success. Our seed is equal to any, we do not care where it may come from.

We have equipped our Seed House with the best machinery possible that we could properly dry, select and grade our corn and so sure are we that our seed will please you that we allow you 10 days after arrival to test it any way you desire. If at the end of that period you are not perfectly satisfied, we will refund your money to you. Could any guarantee be more fair? You are fully protected and take no chances whatever. We have built our business on your trade. Our reputation is our greatest advertisement.

Small orders are handled with the same care as large ones for we strive to please all our customers.

White Cap Yellow Dent

No other Corn on earth will produce more bushels of good solid ears on thin land than our special strain of White Cap. For over thirty years this variety has been grown by us, and no pains spared to improve it for the special purpose of high yield and well developed ears. It not only yields well on thin land, but responds to high culture and rich soil as any other corn. It will do well on either clay or black soil and every farmer should grow one or more fields of this variety against crop failure. The ears are large, slightly tapering, averaging about 10½ inches long. Grain has white cap and yellow body; moderately deep and well filled over surface of cob. Stalks with plenty of blades, making excellent fodder.

Comprises more good points than any other variety ever grown, being suitable to all climates and soils. It matures in 100 to 110 days, commands the highest market price, and taking in all points of merit, is the best field corn grown today. As the name implies, it is a white cap corn—not a white corn, but yellow kernel with a small cob, with moderately deep grains filled out to the very ends. Price, $1.00 per peck; $7.50 per bushel.

Red River
OR RED 90 DAY CORN.

This is a White Cap. Very early and popular in the extreme North, also used extensively to replant, as it can be planted as late as July 1st, and make a good sound crop. If you have to replant late in the season, we know of no variety that will give you any better results than this, for it seems to have the ability to produce a crop when all others fail.

When planted early in season, it matures fully three weeks ahead of the main crop and makes early feed for hogs and dairy cows. It makes a good yield of fair-sized sound ears. In an average season it is reasonable to expect a yield of 75 to 80 bushels per acre. The fodder is medium height, plenty of blades and stands well, having a good system of brace roots. If you want some early corn to mature, then try some of this 90 day corn and be convinced of its merits. Good sound seed stock. Price, peck, $1.00; bushel, $2.50.

Bloody Butcher

This is a good feeders' corn—the ears are of good size, usually nine to ten inches; the color of the corn varies a great deal from dapple yellow to a deep red. The ears taper slowly, 7 to 7½ inches around; about 18 rows medium spaces; cob medium with abundant foliage, making it desirable for ensilage. A high yielder and a favorite feeding corn. Peck, $1.00; $2.50 per bushel.
Early Golden Surprise

This variety is of unusual merit and should not be overlooked by any grower whether producing feed directly or bushels to sell. The fodder is medium height and weight large enough, however, to produce one and two good, big ears. Will do well on any soil and mature anywhere in the Corn Belt.

A great feeding Corn. Early Golden Surprise is well known to many corn growers, and they are planting it year after year. The cob is small and the grain very deep. A bushel of 70 pounds of ears will make from 61 to 62 pounds of shelled corn. The feeding value to the bushel is well worth considering. Cattle eat the whole ear and enjoy it. The color is bright golden yellow with red cob. As to maturity, this corn is just about right. It has matured here when planted very late, and feel safe in saying that it will mature anywhere in the Corn Belt.

Golden Surprise fodder is of the very finest quality. The stalk is medium in height, easy to handle, with a great abundance of broad leaves. Price, peck, $1.00; $2.50 per bushel.

We introduced this corn fifteen years ago and we have never yet found a single person who planted it dissatisfied. It is a variety that makes good in every way. It is valuable for hogging down, for cribbing and using for your own feeding and market. It has no weak points and should be planted on every farm.

Scarff Cash Corn The Best Feeding Corn Grown

We are annually feeding on our farms 400 to 500 head of stock cattle, and we can almost see them put on flesh when feeding Cash Corn. The cob is so small that they eat it greedily, and it is not necessary to shell or cut the ears for them. Our elevators and cattle feeders will pay 5 cents per bushel more for Cash Corn than for the ordinary corn that is generally grown by farmers.

62 pounds of shelled corn per bushel, 70 pounds of ears only 8 pounds of cobs.

A Good Pile of Cash Corn. It Will Yield 80 to 100 Bushels per Acre.

It's All Corn

Early to mature and a yielder of finest ears. Matures any place in the United States.

It is a new deep grained yellow corn, with the smallest cob of any yellow variety known. The ear is large, well filled at butt and tip ends, with beautifully formed deep grains. This corn is beyond doubt the best feeding corn in existence. Matures in about 100 days. Shells easy as early as September. It certainly is the ideal corn. Everyone will buy it for seed who sees it.

It is with a great deal of pride and satisfaction that we offer this valuable new Corn to our customers. We have grown it on our own farms for about ten years, and by careful selection we have it as near perfect as any corn we have ever tried. In fact, everyone who sees it at once recognizes it as the ideal corn. Your money back if the seed is not satisfactory. That's fair

Try it.

We perhaps sell more Cash Seed Corn than all other varieties combined. It is not a show corn, as it varies in color and sometimes in shape of ears, but always to whom we have sold Cash Corn we have never had a single one object to it. It is praised by all as the finest feeding corn they ever grew.

Price, $1.00 per peck; $2.50 per bushel. Sample Ear, 25 cents, postpaid. Per quart, postpaid, 50 cents.
Big Whiskey

We can not say too much in favor of this variety of corn. It is the largest early corn we have ever grown. It ripens at least ten days earlier than Reid's Yellow Dent and yields equally as much if not more than this standard sort. The fodder is very strong in growth and makes great tonnage. For several years we have used this variety for filling some of our silos as we can begin at least two weeks earlier than the regular ensilage varieties. A twenty acre field planted June 1st made a yield of 100 bushels per acre of good sound corn. The ears are large, averaging 11 inches in length with 16 to 20 rows to the ear. The grains are deep, broad and cover the cob well at each end. It has great vitality, germinates quickly and makes rapid growth. It has a good root system bracing the stock well so that it seldom goes down. This variety embraces so many good qualities that we are sure it will be a general favorite when better known. It is a sure cropper and a heavy yielder and can be depended upon for the main crop and can be used for cribbing, silo, feeding from shock or hogging down. We have so much confidence in this variety that we are over anxious for you to try it. It will do all we say and more if season, soil and culture are favorable. Price, $1.00 per peck, $2.50 per bushel.

Woodburn

A deep grain, yellow variety of merit. It originated in Champaign Co., Ohio, and it has figured prominently in many County and State Corn Shows, scoring in points of ear perfection as well as for high yields. It ripens about same season as Learnin. Ears large, well filled with deep grains. Price, $1.00 per pk., $2.50 per bushel.

Pride of the North

90 DAY YELLOW

An Early Corn That Yields.

A corn that has been bred with two points in view: early maturity and high yields. It is a valuable corn for the Corn Belt, North and South. It will yield probably ten per cent less than Reid's Dent or Johnson County White, but will be ready for crib two or three weeks earlier, and you will have a crop of solid corn. We recommend it for early feed or late planting in the Southern and middle corn section, and for all purposes farther north. You will be surprised at the yield of this corn and how early you can commence getting in the crop.

Description. Ears medium, averaging about one inch less than Reid's Dent, and about the same shape. Tips are well filled and butts rounded. Color, bright yellow with red cob. The grains are narrow, wedge shaped, and closely set, making the ears very solid. Cob medium size. A good corn and a sure yielder. The fodder is medium size and well set with leaves.

Price, peck, $1.00; $2.50 per bushel.
Improved Early Mastodon

Will yield 100 bushels per acre on good ground and right tillage. The ears are large and well filled with deep grains that cover both tip and butt ends of the cob. It matures early and is out of the way for early seeding. This is no light yielder as are so many of the early varieties, but one of the heaviest, and if you want good, sound corn, and lots of it, then plant one field at least with our strain of Improved Early Mastodon.

It originated with the same grower as Drought Proof. The ears show two shades of color, white cap and yellow grain, although not so pronounced as the White Cap. It is valuable for main crop when a large ear and early maturity are essential. It is also very valuable for feeding stock, as the grain is not so hard as some other kinds; besides it shells a large per cent of corn from a bushel of ears. It can be planted late and still be in time to mature a crop. It is a cross between White Cap and Yellow Dent. We have an extra fine strain of seed that has been carefully selected for size of ears and early maturity for many years. Price, $1.00 per peck; $2.50 per bushel.

Yellow Clarage

A general favorite in North and Central Ohio, where it seems to excel all other varieties. The ears are short, cylindrical, well filled with plump, broad grains. Medium early, with few small ears or nubbins. Our stock is from prize-winning strains and prone. We recommend it to corn growers in general, as it is well worthy of a trial. A favorite at Ohio Experiment Station. Price, peck, $1.00; $2.50 per bushel.

Leaming

The Leaming is the oldest distinct variety of corn, having been originated in 1828. Our own Standard strain is one that gives universal satisfaction over the entire Corn Belt. 100 bushels per acre is not an uncommon yield. The color is deep, rich, golden-yellow; ears very uniform and of medium to large size, well filled at butt and tip ends. Grains are deep, broad and tapering. Well set on the cob. Length of ears 8 to 11 inches, 7½ to 8 inches in circumference, weighing 12 to 17 ounces each. Each ear has 16 to 24 rows of kernels, with but little space between rows. This is an all-around feeding corn that puts on fat, and the kind that fills your cribs each season.

"No matter who you are or where you live, if you handle live stock and raise all or part of the corn you feed, you can materially increase your profit by growing our Standard Leaming." Price, $1.00 per peck; $2.50 per bushel.

Blue Clarage

Sometimes called Rotten Clarage. Heavy yielder of good solid ears. Matures early. This variety has been a general favorite in many sections and is preferred by many stock feeders. If you have not grown this variety it will pay you to give it a fair trial at least. We have an exceptionally heavy yielding strain. Price, $1.00 per peck; $2.50 per bushel.

"CONNERS PROLIFIC 11 FEET HIGH." (See page 26.)

W. N. Scarff & Sons:
From the Conners Prolific Ensilage Corn purchased from you I filled my silo 14 by 40 feet and refilled it twice off of 8 acres. It was no trouble to find stalks 14 feet high on a single bushel.

FRED TEMM.
Reid’s Yellow Dent

OUR PRIZE WINNING STRAIN.

This variety has won more prizes than all other yellow varieties combined. It is bred to win. If you are interested in high bred corn of prize-winning strain, plant Reid’s Yellow Dent.

Our Prize Winning Strain of Reid’s Yellow Dent holds the same relation to the yellow varieties as Johnson County holds to the white varieties; both are prize winners. In the class of yellow corn Reid’s Yellow Dent always carries away the prizes. It is bred to conform with the score card better than any other yellow variety, and makes an absolutely perfect ear, full, exceedingly well at both ends of the ear. Grains well dent and set close together on the cob in very straight and well defined rows.

This variety was produced from the Illinois grower who won the prize in his state for the best ten ears Yellow Corn at the 1910 Illinois State Corn Show. We purchased our seed stock direct from him buying the very best that he could furnish. We have a perfect sample here on our Ohio seed farm, and can safely be planted any place in the corn growing states. Matures in about 110 days.

Our crop of this prize winning strain of yellow corn is as fine as can be grown, and the seed stock well matured, and carefully selected. Growers will make no mistake in sending us their orders, no matter whether they grow corn for the corn shows, or for market, or for feeding purposes. This variety is the most popular of the yellow sorts. A heavy yielder of splendid specimen ears. A crib or load of this corn is a fine sight to see, and pleases the grower as well as swells his bank account. A very heavy yielder—90 to 100 bushels per acre on good soil.

Our strain of Reid’s Yellow Dent is the best, and you make no mistake in placing your order with us. Our seed corn was gathered early and is well cured, so that you are sure of strong germination. You can depend upon getting good, reliable, native grown seed if ordered from us. We insist on an early order, as we fear the supply of good seed is not sufficient to go around to all who need good seed this spring. Price, 1 fine ear, 50 cents, postpaid; peck, $1.00; bushel, $2.50.

Johnson County White

The Greatest Show Corn in the World. This variety has taken more prizes than all other varieties combined. This is the corn for which we paid $550.00 for 10 ears at the National Corn Show, at Columbus, Ohio. A single ear of this variety has won $1,000.00 in prizes; and during the National Corn Shows at Chicago, Omaha, and Columbus this variety has won approximately $16,000.00 in prizes. It has been bred for a long term of years by the most careful corn breeders and has fixed a type of corn that conforms so closely to the score card that few others have much chance of being winners. It breeds true to type so that Show Corn is the rule rather than the exception. To those wishing to compete for prizes at the fairs and corn shows we would strongly advise planting this variety.

The ears are cylindrical in shape, slightly tapering at the end, well filled out at both butt and tip ends, straight rows with grains close together. Corn pure white and cob same color. The ears run from 10 to 11 inches in length and about 5 inches in circumference. The stalks make a good vigorous growth, well braced with a good system of brace roots, capable of withstanding severe wind storms, as well as drought. The strain we are growing is thoroughly acclimated to our latitude, and is perfectly safe to plant in all corn growing sections except the extreme North, where only very few early sorts can be grown. The ears are very uniform and large size, with deep grains, and will yield 100 to 135 bushels per acre. It is a variety very rich in protein, hence valuable for feeding purposes, also valuable for silo, as it makes as much fodder as the regular ensilage Corn and so much larger proportion of ears, hence a much richer ensilage. Price, $1.00 per peck; $3.00 per bushel.

"MONEY BACK MANY TIMES."

W. N. Scarff:—I think the Johnson County White Corn purchased from you is the finest corn I ever saw. I gave it fair cultivation and have a fine lot of seed corn. I have my money back many times, etc.

BURGESS WRIGHT, Kentucky.

THE BEST HE EVER SAW.

The peck of Johnson County White purchased from you made a great growth. It made 107 bushels on a little over one acre of ground. The stalks grew 12 to 14 feet high. It yielded the most corn of any I ever planted.

E. J. CAREY, New York.

A GOOD REPORT FROM OUR JOHNSON COUNTY WHITE SEED CORN.

W. N. Scarff:—Yield of 185½ Bushels.
My boy, aged 16 years, decided to enter the boys' contest. I gave him a part of your Johnson Co. seed, which he did not get planted until June 5th. The summer was unusually dry. A frost the latter part of September injured a part of his acre. However, when the acre was husked under the supervision of the judges and measured, and shelled and weighed, he had 106½ bushels of shelled corn, the highest official yield in Sandusky County. Had it been planted several weeks earlier and a favorable season, it would have been at least 140 bushels. Sandusky, Ohio.

"BOY GOES TO WASHINGTON."

JAMES A. ERNSBERGER, Ohio.

W. N. Scarff:—Yield of 165½ Bushels.
My boy, aged 16 years, decided to enter the boys' contest. I gave him a part of your Johnson Co. seed, which he did not get planted until June 5th. The summer was unusually dry. A frost the latter part of September injured a part of his acre. However, when the acre was husked under the supervision of the judges and measured, and shelled and weighed, he had 106½ bushels of shelled corn, the highest official yield in Sandusky County. Had it been planted several weeks earlier and a favorable season, it would have been at least 140 bushels. Sandusky, Ohio.

"Bird's Eye Farms."
The Silo is a fixture on the farm and has come to stay. No matter whether you feed for milk or for beef you must have a silo. It is past the experimental stage. It is actual insurance for the farmer and is the best insurance policy he can hold. It insures against drought and short pasture in the latter part of the season and if your pasture burns up a well filled silo will keep up the milk supply equal to the finest grass and put on pounds of beef equally as well.

The next important thing to consider is, "The best ensilage corn to fill the silo." You want first to plant a variety of corn that will make a great tonnage. You want also to plant a variety that will ripen sufficiently to make good solid ensilage with plenty of body to it. You also want a variety that furnishes an abundance of grain so it is rich and will put on pounds if needed for that purpose or both keep the dairy cow in good flesh and at the same time keep up a good flow of milk. We have selected a number of varieties that will give splendid satisfaction.

**Conners Prolific Ensilage Corn**

YIELDS TWO TO SIX EARS ON EACH STALK.

The wonderful new variety of corn that has startled the corn growing people throughout the entire Corn Belt. 150 bushels per acre being no uncommon yield. Investigated and endorsed by the Agricultural Press.

**DESCRIPTION.** The color of the grain is white; the average length of the ears is 8 1/2 inches, and each stalk bears from 2 to 6 ears. The stalks range in height from 12 to 14 feet, according to season and fertility of the soil.

**YIELD.** The seed from which our stock is being sold yielded 150 bushels of corn to the acre, and no fertilizer of any kind was applied to the land.

In every test the yield of the new variety has been at least twice that of the old standard varieties of the Corn Belt. There is no reason why the yield will not reach 200 bushels per acre with proper development. Six ears to the stalk are not uncommon, and only in a few cases will it yield less than two to the stalk. Three and four ears is the general run.

**A WONDERFUL CORN FOR THE SILO.** Beyond doubt this is the best ensilage corn that can be planted if rich ensilage is desired, as there are so many ears on each stalk. Also a great tonnage.

**PRICE OF CONNERS CORN.** Sample packets, 15c; quart, 60c, parcel post, prepaid. By freight or express, not prepaid, peck, $1.25; bushel, $4.00. Shelled only.

**Eureka Ensilage**

This is a favorite ensilage corn with many growers, as it produces an extra large tonnage, as much as 20 tons per acre. The stalks are large, with plenty of blades, and a good proportion of grain. Many stalks produce two good sized ears.

**Johnson County White Ensilage**

Farmers everywhere are realizing the great value of our ensilage strain that we are furnishing and it becomes more popular each year. The amount of tonnage that this corn produces per acre is really marvelous. See page 36 for full description of this great corn.

**Price, peck, $1.00; bu., $3.00. Shelled or ear.**

A Field of Conners Prolific, 14 ft. High.
Alfalfa

The most valuable farm crop of the present time. It will yield greater returns for the labor expended than any other crop grown. Alfalfa nourishes the soil. The acreage devoted to Alfalfa has increased wonderfully in the past few years; and it appears that there will be an equally rapid increase throughout the Eastern and Central States during the coming years. Alfalfa is grown as easily as clover, and produces double the yield. It thrives on a very wide range of soils. Failure to grow Alfalfa successfully is often due to lack of knowledge of the plant rather than to soil conditions. Every farmer in the country should have a field of this profitable crop.

Alfalfa may be cut three to five times a year, and it will yield three to six tons of hay per acre. It is rich in protein, and has a feeding value equal to that of bran. It is the most enriching crop for the ground that we have. Once a good stand is secured it will generally last for eight or ten years.

Good profits come from its use as pasture for hogs.

We will send free inoculation for Alfalfa with each order for one bushel or more. Sample and lowest market quotation sent any time.

Alfalfa Folder and sample seed mailed free of charge if interested and you wish to buy. Price, peck, $4.00; $15.00 per bu. (subject to market change.) Write for low spot cash price.

Timothy Seed

"PINE TREE BRAND." "It stands alone." An extra pure recleaned brand of Timothy Seed at moderate cost. 99¾% average purity test. The demand for high grade seed is increasing. Some retailers have made mistakes trying to secure trade by price instead of quality. The farmer has come to appreciate the economic value of high grade extra recleaned seed. It is gratifying to note the favor which "Pine Tree" Timothy has met throughout the entire grass growing country. Our Timothy Seed is the best you can buy at any price. Send for sample of our Timothy Seed and special description. Price (subject to market changes), peck, $1.50; $4.50 per bushel.

Beef Cattle on Alfalfa Field.
White Sweet Clover
(Ask for low spot-cash price on all Grass Seed.)
Sweet clover will grow in any part of the United States. It will thrive on the poorest sandy soil where no other kind will grow. Within the last few years, only, has its worth been recognized. Sweet clover ranks first of all the clovers as a fertilizer. Live stock soon develop taste for it and prefer it to other hay. Sweet clover sown in spring on well prepared seed bed can be cut for hay the same fall. Can be pastured the next spring until July or cut just before it blossoms for hay and again at later date. Too much cannot be said in its favor and we especially urge our customers to give it a trial at least. It will be to your benefit. We have found its worth and do not hesitate to recommend it to you. Sow 20 to 25 lbs. per acre. Price, $8.00 per bushel hulled seed. Subject to market change.

Canada Field Peas
Our experience has convinced us that the Canada Field Peas are superior to all other kinds as a quick grower of green pasture or producer of peas. The vines are heavy and peas mature very early. Field peas contain an exceptionally high percentage of protein which makes them very valuable for feed. As a legume, every crop grown adds fertility to your soil. Our seed is exceptionally fine. Price, $5.00 per bushel. Subject to market change.

Soy Beans
Mammoth Yellow
The Mammoth Yellow produces twice the amount of forage that other varieties will, but it is much later, hence in more Northerly latitudes may not ripen all its seed although in the season just past it made a fine growth and yielded well in this vicinity. Farther south it could be depended upon to produce immense crops of both forage and seed. Peck, $1.50; bushel, $5.00.

Medium Green Soy
This is probably the best variety for this section of the country, although it does not produce as much forage as the Mammoth Yellow. It makes an exceptionally uniform growth; has good foliage, which it holds up well to the time the seed is maturing, and it yields a splendid crop of seed. Peck, $1.50; bushel, $5.00.

Ito San
Very early. Prolific bearer. Valuable for hogging down or seed purposes. Peck, $1.25; bushel, $4.50.

Dwarf Essex Rape
Dwarf Essex Rape is a pasture plant for all kinds of live stock—sheep, cattle, and swine; and is most valuable for fattening sheep. To provide an early pasture for sheep and swine, it should be sown early in spring. As it grows very rapidly, the pasture will be ready in five weeks from the time of sowing. Unlike other forage plants, rape can be sown at any time during spring and summer, so a good pasture may be had whenever it is needed. Dwarf Essex Rape will prepare sheep and hogs for market better and in less time than any other forage plant.

It may be sown in corn when this is cultivated the last time. Good results are generally obtained for late fall pasture when Dwarf Essex Rape is sown after the spring grain has been harvested. When sown broadcast, 5 to 6 pounds may be sown per acre. Price, pound, postpaid, 25 cents; prepaid, 10 lbs., $1.50; 100 lbs., $12.50 by express, not prepaid. Subject to market change.
Hubam Clover

The New Discovery That Promises to Revolutionize Agriculture

It is the Wonder of the Century

Valuable for feed, green manure, bee pasture, stock grazing, ensilage, seed, poultry and orchard. A general purpose plant that completes a two year job in one. No other known plant equals it in real value.

This new Hubam Clover was discovered at the Iowa Experiment Station in 1916 and was finally traced to Newbern, Alabama, where, no doubt, it originated probably thirty or forty years ago. The Iowa Station in 1917 tested it in comparison with other clovers and found it made the most remarkable growth of 4½ feet while medium red clover beside it under exactly the same conditions made a growth of only 5 inches and common sweet clover 14 inches. Various parts of the United States report 10 ft. growth from Hubam. It makes two crops of hay or one crop of hay and one of seed the same year it is planted. It reads like a fairy tale but it is absolute truth.

Limited space will not permit us saying more about this wonderful new plant of which volumes could be written but the point is what part are you going to take in this deal. The demand for seed is enormous and will be for years to come. It will yield four to eight bushels per acre and at only $1.00 per pound will make a return of $240 per acre for seed alone. Besides the hay crop and added fertility to your soil, it would get down to the price of Red Clover Seed and you got eight bushels per acre. No sensible person should fail to get a start and at once. It is a sure money maker.

When it was first announced that seed could be procured over 45,000 requests were made for sample packets and trials have been made in every part of the United States with most flattering results. In 1919 seed sold for $960.00 per bushel, undoubtedly the highest price ever paid for clover. The Ames station prior to 1919 refused as much as $10.00 per six seeds.

In 1920 dealers asked $5.00 per lb. or $200.00 per bushel. So great was the demand that the price rose to $10.00 per lb. or $600.00 per bushel in a short time and there was not near enough seed to go around at even this fabulous price.

Our supply of seed is genuine, certified stock that you can depend upon. Do not let another day pass without placing your order. It is a chance of a lifetime to do good and at the same time make big money on your investment. Prices may advance.

Price. Large packets, 25¢; $1.50 per lb.; $12.50 per 10 lbs.; $75.00 per bushel.

"We have seen the Hubam Clover growing for three years at the station at Ames and are becoming more and more impressed every year with its possibilities."

H. A. WALLACE
In Wallace's Farmer.

Beardless Barley

This is a great stock food and fat producer. Is best egg producing food known. Sow early as possible in spring. Straw about the height of common barley, but is better, and will stand up on any land; with good land and season has produced 50 bushels per acre. Sow as early as you can; frost does not hurt it. Many will not grow barley on account of the long, harsh beards which are so disagreeable in threshing, although it is a profitable crop. This is beardless and as easy to grow and handle as oats. It has hulls like the Man- shury or any other variety, and is a heavy cropper, yielding 50 to 75 bushels per acre, and the quality is excellent, both for maturing and for feeding hogs and other stock. Try it for your poultry. Price, per peck, 75 cents; $2.50 per bushel.

Wisconsin Pedigreed Spring Barley

The best of the bearded spring varieties of Barley. It has won more prizes than all other varieties combined. The average yield in Wisconsin for the last five years has been 36 1/2 bushels. It has a plump grain, stiff straw, large, well filled heads. It has won prizes at all International Shows of recent years. Ours is genuine Pedigree No. 5 Oderbrucker strain. Price, 75 cents per peck; $2.00 per bushel.

Nurse Crop for Alfalfa

The Spring Barley, including Beardless, White Husless and Wisconsin Pedigree, all make finest nurse crops to sow in spring with alfalfa. They are harvested early and this gives alfalfa a fine chance to grow after harvest.

White Husless Barley

No Beards or Hulls. Great for Feed. White Husless is different from any other barley. The grain looks like wheat. It is almost as heavy as wheat, equal to wheat in feeding value, and will yield nearly twice as much. It succeeds in all barley growing regions, and also in sections where common barley is not grown at all. It is very early, thus making a splendid nurse crop for seeding with clover; it is entirely beardless, with soft straw, splendid for feed. Many farmers cut it for a hay crop. It yields as high as 60 bushels per acre, and specially fine for poultry and for grinding for hogs. Price, $1.00 per peck; $3.00 per bushel of 48 lbs.

Speltz or Emmer

The Great Russian Grain. It has such a stiff straw that it stands up well when oats and barley lodge. It makes a well-balanced feed for horses, cattle or hogs, as the large hull gives it the lightness of oats, while the double kernel furnishes a rich meal much like ground rye feed. Prof. Wilson, of the S. D. Ex. Station, in a careful experiment with feeding calves, found Speltz worth 40 per cent more than corn, pound for pound.

Good for pasture; fattens in the green state; a heavy stouter, and will outyield any other grain on earth. It's the perfection food for cattle; hogs squeal for it; cows will leave other food for it; sheep delight and fatten on it, and poultry relish the grain. Speltz will produce three times the value of wheat or oats. Speltz is a combination of rye, wheat and barley, but resembles barley more than any other grain. Price, 50 cents per peck; $2.00 per bushel of 40 lbs.
Silver Mine Oats

This oats has made for itself a reputation as an extraordinary heavy and reliable yielder. It is very hardy and prolific and yields beautiful white kernels, which are especially desired for the manufacture of rolled oats. Oatmeal is becoming as staple in the United States as it is in Scotland and our mills are handicapped by their inability to obtain good oats.

The heads are very large in proportion to its stiff, bright, clean straw. The spangle top heads, although long, are borne low down on the stalk, which seems to prevent lodging. Price, per pk., 50c; $1.50 per bu. 10 bu. or more $1.25 per bu.

Siberian Oats

First came to Ohio from the Ontario Experiment Station to the Ohio Station at Wooster, and through a series of tests at our station covering a period of eleven years, it stands at the head of the list for yield. The Siberian is a white oat, running slightly to yellow. The straw is sufficiently strong to stand well, and the heads are large, strong, compact, and filled with good plump grains. It shows great hardiness, and no doubt will be eagerly sought after by farmers as soon as its great yielding qualities are known.

At the Ohio Experiment Station, Siberian has made the highest yield of all varieties for 13 years. This record should put it in a class that every farmer would sow at least one field of Siberian. Price, per peck, 50 cents; $1.50 per bu.; 10 bu. or over, $1.25 per bu.

Burt or Ninety-Day Oats

The Quickest Growing, Most Prolific, and Surest Cropping of Spring Oats.

On account of its earliness to mature it is a valuable nurse crop for sowing alfalfa, clover or other grass crops. It is harvested before it injures the spring grass seeding. This is a general favorite for an abundance of choice early feed. Price 50c per peck; $1.50 per bu.; 10 bu. or over, $1.25 per bu.

Regenerated

Swedish Select Oats

The heaviest yielding oats in the United States. Among the earliest to ripen. The stiffest straw of any oats grown. Our stock is bright and clean. 60 to 75 bushels per acre is no uncommon yield. Try at least 10 bushels. We find this new Regenerated variety to be a most wonderful oats, and the claims made by the Agricultural Department are not too strong. At a test at the Wisconsin Agricultural College, the Swedish Select proved the most satisfactory of 36 varieties tested. The yield is simply enormous, and they weigh from 38 to 40 pounds per measured bushel. The straw is stiff, coarse, and is noted for its power to withstand lodging. The grains are large, plump and thick, with good, long, well filled heads. The plant makes a good growth and develops a splendid root system, making it one of the best drought-resisters in dry seasons. It is among the earliest to ripen and succeeds throughout the entire country. Every farmer receiving our catalog should try at least a few bushels of this variety. Price, 50c per peck; $1.50 per bu.; 10 bu. or over, $1.25 per bu.

SPECIAL PRICES ON ALL VARIETIES OF OATS IN LOTS OF 25 BU. OR OVER.

OATS YIELDS 75 BUSHELS PER ACRE

W. N. Scarff & Sons: The Siberian Oats I bought of you are all right. Out-yielded any other oats, yielding 75 bushels per acre. Weighs out heavy.

SWEDISH SELECT OATS YIELDS 60 BUSHELS PER ACRE

W. N. Scarff & Sons: I purchased Swedish Select Oats of you. I plowed my ground the same day my neighbor did and planted the same day. I got 60 bushels per acre and he got 15 bushels per acre. I think your seeds are wonderful.
